Korea Shakes Up Cabinet

Intelligence Chief to Head Government

The Associated Press

SEOUL - President Chun Doo Hwan on Monday named the head of the national security agency to lead his cabinet in a government shake-up that came a week after a new opposition party made major gains in parliamentary elections. It was the biggest shake-up since Mr. Chun, a former general, rose to

Earlier in the day, the 22-member cabinet headed by Prime Minister Chin Ice Chong resigned.

The presidential office announced that the new cabinet would be headed by Lho Shin Yung, 54, director of the Agency for National Security Planning, formerly called the Korean Central Intelligence Agency. A career diplomat, he was foreign minister from 1980 to 1982.

In the new cabinet, President Chun retained the foreign minister and most of the ministers dealing with the economy, indicating that there would be little change in his pro-Western and stability-oriented

But the former general also brought in six relatively successful civilian politicians to help improve the cabinet's image and deal better with the strong opposition that emerged from the election.

Nine ministers from the former cabinet retained their posts, while new people took 13 other posts.

Those retained included Deputy Prime Minister Shin Byong Hyun, Foreign Minister Lee Won Kyung
Finance Minister Kim Mahn Je
mak kim and Defense Minister Yoon Sung

> in last Tuesday's elections for the 276-member National Assembly, the newly formed New Korea Democratic Party outpolled Mr. Chun's Democratic Justice Party in the country's four largest cities, in-soluting the capital of Seoul.

Lo Shin Yung

came the second largest political party by winning 68 seats. Mr. Chun's party holds 148

Mr. Kim returned to South Korea shortly before the election, end-ing two years of political exile in the United States. The authorities immediately confined him to his

Mr. Chun's spokesman, Hwang Sun Pil, quoted the president as saying he expected the new cabinet to carry on national tasks to "meet the expectation of the people aspirng for stability and reform."

reason for suppressing dissent, is aportant to South Korean leaders as they prepare for the 1988 Sum-mer Olympics.

■ Reaction to Scuffle

A scuffle between security police and U.S. supporters of Mr. Kim at Seoul Airport this month was "a trivial incident" in comparison to recent human rights strides in South Korea, Elliott Abrams, assistant U.S. secretary of state for human rights, said Sunday in Washington, the Los Angeles Times reported.

Mr. Abrams cited last week's elections as proof of South Korea's commitment to human rights. Representative Edward F.

Feighan, Democrat of Ohio and a member of the House Foreign Affairs subcommittee on human ights who accompanied Mr. Kim to Seoul, disagreed with Mr.

Mr. Feighan described the scuffle as "an important incident" because of the U.S. commitment to South Korea. Washington provides \$250 million in military aid each The party, supported by the dis-sident leader, Kim Dae Jung, be-are stationed there.

U.S. Plans Satellite **Defenses**

System Includes Surveillance Of Deep Space

By Walter Pincus Washington Post Service
WASHINGTON -- The Penta-

gon is developing a generation of deep-space navigation, communi-cations and spy satellites capable of evading Soviet attack, aided by a nearly completed network of ground stations that will keep constant surveillance on all objects in deep space, according to sources inside and outside the Reagan administration.

Studies are under way to see if the satellites also can be armed to defend themselves

The satellites, which would hover 22,000 miles (35,000 kilometers) in space, are being hardened against radiation and laser attacks. The demand for stability, which often has been cited in the past as a engines so they can be maneuvered away from attack.

At the same time, Spacetrack, a little-publicized worldwide network of five space-watching facilities, is nearing completion. When operational in 1988, it will give constant global coverage of all satellites in deep space.

"We are looking at the ultimate video game," a nongovernment source said last week. "With telescopes and video displays, the United States will be able to watch any attacker approach its satellites and, by sending off signals, have that satellite maneuver away," he

Eventually, he added, it may be ossible "to attack the attackers." The space-based surveillance system, in addition to replacing the ground-based Spacetrack system, would serve as a part of President Ronald Reagan's Strategic Defense Initiative, according to budget documents made available by the administration. President Reagan's plan, popularly called "star wars," is designed to detect and destroy missiles in flight.

The goal of the new satellite sys-(Continued on Page 2, Col. 4)

Across Borders, Pullout Leads to Fears

In Sidon, Past Catches Up With Israeli 'Collaborator'

By John Kifner New York Times Service

SIDON, Lebanon - The past caught up with Mohammed Habli here Sunday.

For the 32 months of the Israeli Army's occupation, he was one of a triumvirate of local militia leaders that Sidon residents say were "enforcers" for the Israelis, terrorizing the population.

Now that the Israelis are pulling out of southern Lebanon — their last troops left Sidon on Saturday — their "collaborators," as they are called, are increasingly under attack. [Thousands of Moslem fundamentalists from Bej-

rut, backed by hundreds of armed men, poured into Sidon on Monday, smashing liquor stores and demonstrating against President Amin Gemayel, Reuters reported from the city.

Shouting slogans against Mr. Gemayel, Israel and the Lebanese Army, they demonstrated for the establishment of an Islamic republic but then headed back (Continued on Page 5, Col. 1)

A City in Northern Israel **Expects Renewed Shelling**

By Edward Walsh

KIRYAT SHEMONA, Israel - Haim Bitton, director of security in this northern Israeli city, has been preparing for the day for six months. After last sum-

mer's parliamentary elections in Israel, the mayor told him to begin cleaning up the city's 140 public shelters-because they would soon be needed again.

Zeev Peleg, the principal of Danziger High School here, waited a while longer before he acted. But by late November, almost two months before the government in Jerusalem made the inevitable decision to begin withdrawing the military from southern Lebanon, Mr. Peleg had reinstituted regular drills in schools so that children would know how to reach the shelters, and

what to do when they gathered there.
"I knew it was coming," Mr. Peleg said Sunday in his office here, about 5 miles (8 kilometers) south of the Lebanese border.

What Mr. Bitton, Mr. Peleg and others here have (Continued on Page 5, Col. 1)

Westmoreland **Drops Libel Case Against CBS**

By M.A. Farber New York Times Service

NEW YORK - General William C. Westmoreland has dropped his \$120-million libel suit against CBS in an agreement under which the television network will not disavow the 1982 documentary on the Vietnam War that is the basis of the suit and will not pay any money to

the retired general.

As part of the settlement, CBS also agreed not to demand payment of any court costs by the general, lawyers on both sides of the case said Sunday night.

[The parties issued a joint statement Monday saying that "their respective positions have been ef-fectively placed before the public for its consideration and that continuing the legal process at this stage would serve no further purpose," The Associated Press reported

["Historians will long consider this and other matters related to the war in Vietnam," the statement said. "Both parties trust their actions have broadened the public record on this matter."

"CBS respects General Westmoreland's long and faithful service to his country and never in-tended to assert, and does not believe, that General Westmore-land was unpatriotic or disloyal in performing his duties as he saw them," the statement added. "General Westmoreland respects the long and distinguished journalistic tradition of CBS and the rights of journalists to examine the complex ssues of Vietnam and to present perspectives contrary to his own."

The agreement is to be read Tuesday to the jury in the case, which will then be dismissed.

The settlement came after 18 weeks of testimony by 36 witnesses in U.S. District Court in Manhattan and only a week before the case, which is believed to have cost at least \$7 million to \$9 million, was scheduled to go to the jury.

The settlement discussion was apparently initiated last week by Dan M. Burt, General Westmoreland's principal lawyer.

The costs of pursuing the case for General Westmoreland about \$3.25 million since the suit have been borne by the Washington-based Capitol Legal Foundation, of which Mr. Burt is presi-

He said recently that the foundation, which is supported by conser-vative foundations and businessmen, was "\$500,000 in the hole." The suit stemmed from a CBS

Reports documentary titled "The Uncounted Enemy: A Vietnam Deception," produced by George Crile and narrated by Mike Wal-

Both men are individual defendants in the case, as is Samuel A. Adams, a former Central Intelligence Agency analyst who was a paid consultant for the broadcast.

The documentary charged that General Westmoreland's command had engaged in a "conspira-cy" in 1967 to show progress in the war by understating the size and nature of the North Vietnamese and Vietcong enemy.

As a result of this "conscious effort," it said, President Lyndon B. Johnson and American troops, as well as the public, were left "totally unprepared" for the Tet offen-

sive by the Vietcong.

The broadcast said that, for political and public relations reasons. General Westmoreland imposed an "arbitrary ceiling" of 300,000 on

reports of enemy strength.

Shortly after the trial began. Judge Pierre N. Leval said the issue in the case was not whether Gener-

Westmoreland's command was "right or wrong" in its reports of enemy strength but whether the general had "attempted to deceive" his superiors. General Westmoreland called to

the stand 19 witnesses, including a number of his senior military aides in Vietnam and a battery of ranking government officials from the Johnson administration.

Virtually all of these witnesses testified that the general did not, would not, and even could not deceive his superiors.

CBS began presenting its case on Jan. 8. Besides Mr. Adams and Mr. Crile, its witnesses included George W. Allen, a former deputy to George A. Carver Jr., the chief of Vietnamese affairs for the CIA; a number of other CIA and military intelligence analysts from 1967; and, in recent days, two key aides

to General Westmoreland. One of those aides, Major General Joseph A. McChristian, testified that, in May 1967, General Westmoreland delayed sending a cable to Washington reporting increased strength of enemy irregulars because it would have been a "political bombshell."

The other aide, Colonel Gains Hawkins, former chief of General McChristian's order-of-battle section, said that General Westmoreland had fixed a "dishonest" ceiling on total enemy-strength figures because higher figures were "politi-cally unacceptable."

In an effort to force European

est to the battle area — the French, West German and Italian forces putting new emphasis on light forces when the biggest problem for U.S. forces is to get heavy equipment from the United States to Europe, Mr. Nunn said, NATO partners should go heavy and the U.S. light, the senator contended. so it would be easier to airlift army

Senator Says He'll Show Pentagon Where NATO's Strategy Is Flawed

By George C. Wilson Washington Past Service

WASHINGTON - Senator Sam Nunn of Georgia, the ranking Democrat on the Senate Armed Services Committee, has served notice on the Pentagon that in coming months he will show why he believes that the current North Atlantic Treaty Organization strategy is

Mr. Nunn and his congressional allies intend to try to explode what they consider the myths of the North Atlantic Treaty Organization in a debate that is expected to be at least as far-reaching as last year's over the proposal to with-draw some U.S. troops from Eu-

The senator sounded the tenor of the upcoming NATO debate last week when he had General John A. Wickham Jr., the U.S. Army chief of staff, at the committee's witness table for the first time since President Ronald Reagan sent his new

Why, Mr. Nunn asked the gener-al, is the United States spending billions of dollars to stockpile enough ammunition to fight for months in Europe when European armies on the flanks would run out of ammunition in a few days?

"If you're a Soviet military man," Mr. Nunn asked, "and you thought the U.S. Army could fight 75 days, with everybody all around them running out in about 12 days, would that add to deterrence?" He added that once a war started, U.S. units could not dash around the battlefield trying to dis-

tribute ammunition to allied units that had run out. General Wickham conceded that in that "hypothetical" situation the U.S. forces would be better off with

more tanks and artillery than a mountain of ammunition

Mr. Nunn and his allies cite the different ammunition supplies as an example of the mismatch between the defense efforts of the United States and its NATO part-

This year, like last, Mr. Nunn and his allies are to argue that un-less European NATO partners spend more to build up their conventional forces, the only way to stop a Warsaw Pact invasion would be to fire nuclear weapons. They quote past congressional testimony of General Bernard W. Rogers, commander of NATO forces, in making that argumer

"Because of the failure to meet commitments in the conventional area by all nations and through trying to buy alliance defense on the cheap by relying on nuclear weapons, we have mortgaged our defense to the nuclear response."

General Rogers added that in warning against having to resort to nuclear weapons, "I'm talking about it in terms of days, not in terms of weeks or months."

members of NATO to improve conventional forces and fulfill such commitments as building shelters at airfields for U.S. warplanes, Mr. Nunn proposed last year to reduce the number of American troops in Europe if goals were not reached. The amendment was blocked on a 55-to-41 vote.

General Rogers is expected to repeat his warnings when he testi-ties before the Senate Armed Services Committee later this month.

Why are the NATO armes clos-

ive long enjoyed.

Some agricultural economists y that food production will be-me less costly and food will be-me slightly less expensive, not cause more skillful operators will be over but because of the losses /ffered by failing farmers. Others, ey say, will get the lost land at

Other agricultural economists, vever, foresee an increase in abintee ownership, with outside instors stepping in to bid on land at farmers cannot finance and (Continued on Page 2, Col. 6)

Farmers and others onlookers await bidding on a foreclosed Nebraska farm, a scene that is becoming more common as the number of family-owned U.S. farms continues to decline.

Getting to Top: Talent Helps but It's the Practice That Counts

By David G. Savage

LOS ANGELES - A five-year study of 120 of the top artists, athletes and scholars in the United States has concluded that drive and determination, not great natural talent, led to their success.

"We expected to find tales of great natural gifts," said

Benjamin Bloom, a University of Chicago education pro-fessor who led the team of researchers. The group studied the careers of U.S. performers in six fields: concert pianists, Olympic swimmers, sculptors, tennis players, mathematicians and research neurologists. "We didn't find that at all," Mr. Bloom said. "Their

mothers often said it was their other child who had the The most brilliant mathematicians often said they had trouble in school and were rarely the best in their class. Some world-class tennis players said their coaches viewed them as being too short to ever be outstanding, and the

Olympic swimmers said they remember getting regularly "clobbered" in races as 10-year-olds. The research team conducted in-depth, anonymous interviews with the top 20 performers in the six fields, as judged by national championships or similar honors.
They also interviewed their families and teachers, hop-

ing to learn how these individuals developed into great Instead, the researchers heard accounts of an extraordinary drive and dedication through which, for example, a child would practice the piano several hours daily for 17 years to become a concert pianist.

A typical swimmer would tell of getting up at 5:30 each morning to swim two hours before school and then two hours after school to gain his or her goal of making the Although practice and motivation seemed to explain their success, the performers, regardless of their field,

appeared to follow a similar course of development, the

In practically every case, the parents played the key role, first by exposing their children at an early age to music, sports or learning. The vast majority of the parents were not themselves outstanding musicians, athletes or

But the parents of the swimmers and tennis players did enjoy sports and valued competition, Mr. Bloom said. The

These parents placed great stress on

doing one's best at all times.' families of the pianists and sculptors appreciated art and music, while the parents of the research scientists dis-

played a great love for learning. The parents of the mathematicians and research neurologists reported that their children showed both an unusual curiosity about how things work and an "independent nature" that allowed them to play or work alone

for hours. The parents also taught their children to value hard work and competition These parents placed great stress on achievement, on success and on doing one's best at all times," Mr. Bloom said. "They were models of the work ethic, believing that

work should come before play and that one should always

work toward distant goals. The results of the research will be published this week in book titled. "Developing Talent in Young People." The families said in the interviews that once a child displayed an interest and enthusiasm in a particular area, these parents encouraged them at every step and were willing to spend countless hours shuttling them to and from piano, tennis or swimming lessons.

The study also found that these achievers, all of whom vere younger than 40 when interviewed, appeared to have gone through three distinct stages of development, regard-

At first, the parents exposed the children to playing a piano, tinkering with scientific games or hitting a tennis ball, but it was just fun. They played tennis with their families, for example, and developed the habit of regular practice. Usually, the children also had some outside nstruction, perhaps from a neighbor or a relative.

Then, at some point, they began to gain recognition for their ability. A 7-year-old would play the piano for a school performance. An 8-year-old would beat all the other children at his local tennis or swimming club. "Within two to five years, most of the individuals in our study began to see themselves in terms of the talent field," Mr. Bloom wrote. "They began to see themselves as pianists' and 'swimmers' before the age of 11 or 12, and

athematicians' before the age of 16 or 17." "Most of our talented individuals had very good experiences with their initial teachers, and many had developed a very comfortable relationship with them," Mr. Bloom

At the second stage of development, as a child's rapid progress become apparent, the parents usually sought out a more expert instructor or coach. Typically, the new teachers "were perfectionists who anded a great deal of practice time for the student and looked for much progress in a relatively short period of

time," Mr. Bloom wrote.

In the middle years, these young people first tasted At this point, their commitment to their field escalated one step further. The subjects said they began "living" for swimming, or tennis or the piano and devoted hours each day to practice. They also sought out the nation's best

EC Ministers Back Italian Proposal

BRUSSELS (Reuters) — A majority of European Community nations supported Monday an Italian proposal designed to prevent a cash crisis this year, but diplomats said West Germany continued to hold out

Bonn has been insisting for several months that an agreement to provide new funds for the EC be directly linked to the entry of Spain and Portugal. It refuses to bring forward the agreement in spite of a deadlock in the entry talks and the threat of deepening financial problems. The 1985 deficit is expected to be about 3 billion European Currency Units

The other EC members back the Italian proposal to linance the deficit by grants that are refundable when the entry negotiations are completed.

D'Amato Says Poland Links Solidarity Office to CIA

WARSAW (UPI) - The Polish government on Monday accused the Brussels office of the Solidarity trade union movement of treason because of alleged links with the ClA.

Colonel Zbigniew Pudysz, chief of the Interior Ministry's investigation office, said a military prosecutor was conducting an inquiry into the center. In an interview carried in Polish newspapers, Colonel Pudyst said exiled Polish leaders of the Belgian Solidarity coordinating office were working with the CIA and with an underground branch of Solidarity.

"The Brussels office heads are Jerzy Milewski, Miroslaw Chojecki and

others known for their anti-state activity," he said in the state newspaper Zycie Warszawy. "The investigation into this case concerns the crime of

Record Snow Disrupts Geneva Area

GENEVA (AP) - Road, rail and air traffic in the Geneva area remained chaotic Monday after a weekend storm that brought a record amount of snow — up to three feet (about a meter).

Geneva's Cointrin international airport, closed since Saturday night, resumed only partial operation Monday. Planes were departing up to three hours late, and none were permitted to land. Trains were up to 90

Only a handful of Geneva's bus and streetcar lines were operating Monday after a complete halt on Sunday. Taxis were scarce. Some people walked an hour or more in wind and deep snow to get to work.

marked from a European country. China Rejects U.S. Charges on Rights BELING (UPI) - China rejected on Monday a State Department

report charging human rights violations in the country, calling the allegations "groundless and improper."

In a statement issued by the Foreign Ministry, China said: "The State

Department of the United States has made groundless and improper comments on the domestic affairs of China. We want to express our regret. All the fundamental rights of the Chinese people as stipulated by the constitution and other laws are fully guaranteed by the Chinese gele, who would be 73 if still alive, government. The Chinese people have never before enjoyed democracy may be hiding now.

and rights and freedoms so extensively and fully as they do today.

The report on China was contained in the State Department's annual assessment of human rights violations worldwide. It was issued last week

More Politicians Arrested in Pakistan

ISLAMABAD, Pakistan (AP) - A new wave of arrests Monday virtually completed the military government's crackdown on opposition

leaders, with parliamentary elections slated in a week.

In Karachi, Pakistan's biggest city, 980 miles (1,580 kilometers) south also seeks to determine whether the of here, four ranking figures were placed under house arrest, the police said. The fifth arrest took place in Lahore, 180 miles southeast of Islamabad.

Arrested in Karachi were Ghilam Mustafa Jatoi, leader of the left-Afrested in Karachi were Gillam Mustara Jaioi, icader of the ictileaning Pakistan People's Party; Sherbaz Khan Mazari, head of the
National Democratic Party; Shah Ahmad Noorani, who heads a rightist,
political-religious party Jamiatul-Ulema-e-Pakistan; and Kawaja Khairuddin, leader of the Pakistan Muslim League. Qaswar Gardezi, head of
the Movement for the Restoration of Democracy, was arrested in Lahore along with at least six political activists, opposition sources said.

For the Record

Jeremy Levin, the American television reporter who was freed Thursday after 11 months as a hostage of unidentified captors in Lebanon, returned Monday to the United States. He arrived at Andrews Air Force Base in Maryland from Frankfurt.

Imelda R. Marcos, the wife of President Ferdinand E. Marcos of the Philippines, said Monday in Manila that her husband has recovered fully

from a recent ailment and will not resign. (UPI)
King Hassan II of Morocco dismissed his foreign minister, Abdelouahed Belakziz, early Monday and appointed Abdellatif Filali, one of Morocco's most experienced diplomats, to replace him.

Foreign Minister Andrei A. Gromyko of the Soviet Union is to visit Spain on Feb. 28 after talks in Italy, Western diplomats said Monday.

Trend Is to Bigger, Fewer U.S. Farms With High Social Costs in Rural Areas

many landowners being reduced to

Most agree that the implications for the next few years are wrenching economic trauma, largely in the midcontinent, the principal foodproducing region, which has en-

oyed the greatest tax-supported benefits of price supports and sub-"Nobody is going to be left unscathed, neither the farmers, the lenders nor the suppliers," said Neil Harl, a specialist in the economics of farming and agricultural law at lowa State University. "And

in many small communities the quality of life is likely to be one of the victims." "It's cry-in-your-beer time," said Kent Puchbauer, agricultural loan officer at the Cape County Bank of Jackson in southeastern Missour.
The farmers we are losing are the

young, the knowledgeable, the agessive, the ones American agriculture can least afford to lose. Like Mr. Harl and Mr. Puch-

bauer, bankers as well as farmers look at the economic scene in light of the farm debt and interest costs. The debt has risen 63 percent over the last six years, to \$215 billion from \$132 billion. Interest costs

corn and wheat have fallen. in the 1970s, climbed as many farmers relinanced land mortgages to pay for crop and livestock losses

have risen faster, reaching a current rate of more than \$21 billion a year, while prices of basic crops such as The debts, many beginning with land and equipment loans for farm. We guess that when farmers go

on either crops or piled unpaid interest charges on older debts.

Management and Budget, who said recently that the farm economy was suffering from "overinvestment." But most do quarrel with his conclusion that farming is a business like any other and that the farm and the national economy will ultimately be better off for a tempo-

"Clearly, if you let market forces make the decision for you," said Michael Phillips, project director for the food and agricultural re-sources group in the Office of Technology Assessment, a congressional agency, "then you are going to witness a vast structural change in agriculture. The moderate-size is not going to be able to

The number of farmers has gradually declined over the last 50 years, to about 2.37 million, from more than 6 million. And now most of them, about 1.7 million, produce

What will happen to the bulk of the 700,000 or so who produce more than 90 percent of the country's food is a matter of conjecture that can be guided only by the past, say some other economists, such as John E. Lee Jr., administrator of the Agriculture Department's Economic Research Service:

tremendous washout of business-es," Mr. Lee said, "particularly on the Main Streets of small towns. expansion in a period of prosperity broke it will bring structural changes. But, to be candid, we don't really know the structural implications."

Others question whether the failing farmers are suffering from their where most of the troubles have Few economists quarrel with the own mistakes as much as from eco-occurred.

cold realism voiced by David A. nomic strategies adopted by their Stockman, director of the Office of government.

The guys burning the most are the risk-takers of the 1970s," said Kenneth Farrell, director of the National Center for Food and Ag-ricultural Policy Research, a Washington study group. "Many are pretty efficient larmers."

Since that time, land and equip-ment values have toppled. Those same farmers' debts could now equal as much as 60 percent of the

Their downfall, many experts say, resulted from a failure to foresee government moves, including a tightening monetary policy.

Now, many of the experts also ask, should not the government act to ease the hardships resulting from its change of economic strategy? For the last two years many government economists have been saying the problems were concentrated primarily among middle-size farms with annual sales of \$40,000

to \$500,000, leaving the largest, those with sales above \$500,000, relatively untouched. Now many of the same economists say they find that relatively few of the largest group are involved in production of grain for cash markets, where the problems have been most severe. Those who

"From 1981 to 1983, we saw a are so involved, the economists say. often are suffering as well. The largest farms, about 25,000, or one percent, with sales above \$500,000 a year, produce about 30 percent of all farm products in terms of cash volume and earn about half the profits. But among them only 14.6 percent, or about 3,650, are in the cash grain group.

A modest headstone marks the grave of Nikita S. Khrushchev at the Novodevichy Cemetery in Moscow. It gives his name and the dates of his birth and death.

Soviet TV Shows Khrushchev For First Time Since Ouster

By Dusko Doder

Washington Post Service MOSCOW - The image of Nikita S. Khrushchev appeared for several seconds on Soviet television screens Sunday for the first time since he was removed from power in October 1964.

Khrushchev was seen in the rebroadcast of a joint Soviet-Indian Ilm about Jawaharlal Nehru, India's first prime minister. Footage of Khrushchev that had been deleted in a showing of the film Jan. 26 was restored. There was no explanation for the change.

The Indian version of the film had shown Khrushchev, the former

Soviet Communist party leader. meeting and conferring with Nehru and also included lengthy shots from Khrushchev's triumphal tour of Marshal Nikolai Bulganin, who served as premier under Khru-

shchev but was subsequently disgraced for alleged "anti-party" activities, was originally shown as greeting Nehru on his arrival in Moscow. That was Marshal Bulganin's first appearance on Soviet television since 1957, when Khrushchev defeated his opponents. Marshal Bulganin allegedly supported the Khrushchev opponents. Sunday's showing retained the footage of Marshal Bulganin but also showed Mr. Khrushchev in at least three sequences.

The fact that Khrushchev's image had finally been shown on national television on prime weekend time apparently involved a high-level decision.

Since his removal in 1964, Khrushchev's name had appeared three times in the Soviet media. The first involved criticism of him at the time his memoirs were published in the United States. The second was a brief announcement of Khrushchev's death in 1971. The only positive mention came in February 1983 when Yuri V. Andropov was the party leader and involved Khrushchev's prominent role in the battle of Stalingrad.

No picture of Khrushchev had appeared here for two decades. Sunday's action was not seen as indicating that Khrushchev was soon to be restored to the pantheon of Soviet heroes. By and large, he remains a nonperson.

U.S. Seeking to Protect Satellites in Deep Space

(Continued from Page 1)

tem, according to an air force report to the Senate Armed Services Committee last year, "is to develop which will provide full Earth orbit coverage, reduce dependency on overseas basing of sensors and provide timely, operational coverage of objects and events in space."

In his annual report to Congress this month, Defense Secretary Caspar W. Weinberger said the space-based system would "defend U.S. space-based systems" and would monitor hostile space weapons

The United States and Soviet Union have two types of military satellites: those in low orbits above the atmosphere, up to about 1,500 miles high; and others that are sent much farther into "geosynchronous" orbit in deep space, where they orbit at the same speed as the Earth's rotation and thus remain suspended above the same spot on Earth.

The Russians for 10 years have had a rudimentary weapon that is designed to knock down low-level U.S. satellites. The Pentagon is beginning tests on its own weapon that would be able to knock out

In Managua, An Increase In Squatters **Sandinists Offer** No Hope to Most

By Larry Rohter

New York Times Service
MANAGUA — In local slang. k Italian Proper they are known as parachutists. They are the landless squatters of Managua, and they have earned their nickname by landing on emp-ty lots in every corner of the Nica-raguan capital and building themselves makeshift residences of wood, plastic and cardboard.

No one here, not even in the Ministry of Housing and Human Settlements, knows how many there are, but their number is clear-

ly growing.
Managua's population has grown from 600,000 to nearly 900,000 since the Sandinist government came to power in 1979, and tens of thousands of those newcomers have gravitated to "spontaneous settlements" indistinguishable from the squatter slums of Rio de Janeiro or Lima.

In the last five and a half years, the Nicaraguan government has spent more than \$150 million on housing programs for the country's 3,2 million people.

Even so, the Housing Ministry estimated in 1983 that the "housing deficit" was at least 300,000 units. That situation appears to bave been aggravated by the austerity -rapts General budget this year, which has slashed housing expenditures by a third, to \$40 million.

> The Sandinist government inherited part of the housing problem from the regime of General Anaswhat is now central Managua was devastated by a 1972 earthquake tions are precarious, with little pro-that reportedly killed 10,000 peo-tection from the elements and diffi-

Nicaraguan settlers collecting their water at a communal tap in Managua.

ple. Fighting during the revolution also took its toll on the capital.

For many Nicaraguans, especially those in the cities, the possibility of obtaining new or better housing through official channels seems to be receding. As a result, many have taken the situation into their own hands and moved onto unused parcels of land.

One day last September, for exof Managua's main roads, naming their settlement Martyrs of Pantasma in honor of a group of San-dinist war heroes. Now, at least 3,000 families, or more than 15,000 people according to residents. live

The settlers say that living condi-

and fuel. Their future, they concede, is uncertain.

Some have come from the countryside in search of jobs and a bet-ter life in Managua. Others have been displaced from their villages by attacks by anti-Sandinist rebels or, they say, forced removal by the Nicaraguan Army.

The government however, has ample, a small group of families made it clear that its plans preclude occupied a vacant field just off one aid to the squatters. Housing Minister Miguel Vigil Icaza said that "almost no" new housing construction was planned for Managua and that the problem was likely to get worse before it got better.

"We do not propose to do any-thing," Mr. Vigil said. "We are not going to expel them, but neither are we going to provide them with services like legal connections to water

cult access to water, toilets, buses or electricity, much less start programs for titles to the land."

Managua's squatters, he said, belong to "nonproductive sectors" of the economy, and any effort to im-prove their living conditions would simply continue the "distorted economic structure" the Sandinists are trying to eradicate.

me squatters resent this attitude, and many feel they are being passed over in favor of Sandinist

In particular, their complaints are directed toward a showplace housing project in a barrio called Batahola Sur in southwestern Managua. There, 860 new homes have been built and occupied by families chosen through a system in which, according to the residents of the model project, political loyalties were one of the principal criteria.

3d Heart Recipient Passes Quiet Night Without Bleeding

LOUISVILLE, Kentucky Murray P. Haydon had a "very uneventful night" less than 24 hours after a "perfect" operation to implant the world's third permanent artificial heart, doctors said

Mr. Haydon's vital signs were "extremely stable" and his initial Nov. 25, doctors said.

Mr. Haydon's clinical condition was listed as critical Monday, but stable. Sunday, he squeezed his wife's hand when she visited, and he waved to her during a later visit. Mr. Schroeder has had recurring

fever since Feb. I and has been in low spirits because of delays over leaving the hospital. Both problems could threaten his life, said Dr. Allan M. Lansing, director of the Humana Heart Institute. The first recipient, Dr. Barney B. Clark, lived 112 days with the heart, a Jarvik-7.

United Press Interna

recovery was better than that of William J. Schroeder, who had the second artificial heart implant ly slowing Dr. Lansing said Mr. Haydon,

"The trouble in the intelligence

has hurt mortgage lenders and in-surers. It has also heavily burdened the Federal Housing Administration and the Veterans Administra-

Today, with the abrupt slowing

From abandonments of Texas condominium units by unem-ployed oil-field workers to foreclosure auctions that have uprooted families in many communities in the industrial East and Middle West, officials sketch a picture of distress that has been little noticed outside the housing and home fi-

The inventory of foreclosed homes held by the Federal Housing Administration, which guarantees about 13 percent of all home mortgages, has risen to 40,000, up from 28,000 18 months ago.

Alan J. Kappeler, director of sin gle-family housing at the FHA, called the high foreclosure numbers "alarming, from the standpoint that so many people are losing their

which guarantees 11 percent of all new mortgages, took over 29,000 foreclosed houses last year, 10 percent more than in 1983.

According to the most recent nationwide figures, 25 foreclosures were begun in the third quarter of last year for every 10,000 mortgages, the same rate as in 1973. The rate surpassed 20 in 1982, for the first time since 1975, at the same time that inflation was dramatical-

Home Mortgage Foreclosures Rise in U.S.

Decline in Inflation of Housing Prices Is Cited as a Principal Factor in Evictions

By Ben A. Franklin
New York Times Service
WASHINGTON — The rate of creased to a level close to the record set in the 1973 recession, causing anguish for tens of thousands of Americans evicted from homes for which they can no longer afford monthly payments.

Many housing economists cast an unexpected player as the villain: the rollback of inflation, particu-

larly in housing prices. It has removed one safety net for homeowners at the same time that the customary causes of foreclosure continue; loss of a breadwinner's job, or of a spouse's second income, or exhaustion of unemployment benefits or cuts in pay.

In earlier recessions homeowners could often avoid foreclosure by selling a house for more than they had bought it for, paying off the mortgage and moving into a cheap-

of a decade of inflation and with outright declines in house prices in some places, housing officials say many young families are moving at

nance industries

in housing inflation is entirely the home inflation not halted, it might have bailed out most of those who got in trouble."

The Veterans Administration

In recent months, says Robert M. O'Toole, director of the VA's 58, who was operated on Sunday, loan gnarantee service, the six had no signs of excessive bleeding, states with the highest and most Mr. Schroeder, 53, had surgery to static inventory of houses fore-Michigan, Ohio, Illinois, Indiana, Texas and California.

gets. Selling the house now for the These conventional loans constipurchase price, without the added lift of inflation, would not net enough for a down payment on a more manageable home

The new surge of foreclosures

The Reagan administration is proposing steep increases in fees to be paid by those who receive home loans guaranteed by the two agen-cies. Furthermore, housing officials said the losses in the home mortgage industry is likely to add to pressures for stiffer credit standards for qualifying for loans. That could put loans out of reach for

"No doubt about it, we've taken a tremendous hit," said Steven P. Doehler, executive vice president of the Mortgage Insurance Companies of America, the Washingtonbased trade association of underwriters of home mortgages not covered by the two U.S. agencies.

tute about three-fourths of the 30 million home mortgages in force.

Within the national trend of rapidly rising foreclosure rates, there were wide regional variations. On Long Island, New York, the number of foreclosures has declined in

recent years. But in Tulsa, hit hard by the oil slump, the FHA is foreclosing on mortgages at a rate of more than 100 for each 10,000. Houston and Denver, also hit by declines in oil or oil shale development, are not

Mr. O'Toole said: "Your typical guy in a VA foreclosure is a Vietnam veteran, blue collar, in a home with an average price of \$43,000. The home loan was originally qualified based on two incomes, his and his wife's, and that's where most of the problems start. When the hard times come, the first people laid off are the part-timers, and that is often the wife. Then, even where we see these people returned to work, it is at severely reduced incomes.

The jobs that put them back in the

Thomas R. Harter, chief economist of the Mortgage Bankers Association, said that unemployment has always been a cause for mortgage delinquencies, "a problem of a month or two in arrears, but short of foreclosure."

"With continued inflation," Mr. Harter said, "you could have sold that house off and paid back the lender and it would never show up as a foreclosure."

In part. Mr. Harter blames the home finance industry for its own

"When home inflation disappeared they just didn't believe it," he said. "They didn't adjust. They thought it would all come back. They didn't tighten up the standards on which they had made a lot of these risky loans. They took risks because they thought, no matter what happened, they would be covered by home-price inflation. Delinquency and foreclosure is the re-sult of that process, and now they are writing off a lot of those loans."

next May was beginning to confront him with diplomatic questions of greater complexity than he cared to cope with. He was to be in Bonn from May 2 through 4 for the seven big industrial democracies' annual summit conference on economic policy. That much was set-tled. But what about May 8, the 40th anniversary of the end of World War II in Europe? That is where the planning got stickier. Last June the Western allies of that war had conspicuously omitted the Germans from their commemorations of the Normandy invasion. and the German government was not anxious to have the snub repeated. But Mr. Reagan did not care to risk any gesture that might have unintended implications in Europe's complex and unfamiliar internal politics. Precisely where was he to go, and what message was his presence there going to convey?

The White House has now arrived at a deft

solution. On May 8 Mr. Reagan will address the European Parliament in Strasbourg - in France, but on the German border. Strasbourg and the parliament symbolize a great many things that an American president can enthusiastically support without fear of getting entangled inadvertently in the domestic divisions of the countries that he is visiting Strasbourg, which has been under both flags, now stands for reconciliation between France and Germa-

President Ronald Reagan's trip to Europe ext May was beginning to confront him with iplomatic questions of greater complexity movement to unify Western Europe, the parliament there has become the European Community's legislature. It hardly has the importance of the national parliaments but. particularly since the recent introduction of direct elections, it is by no means insignificant.
As a point on Mr. Reagan's itinerary, the
parliament at Strasbourg will stand neither for the war nor for the victory of 1945, but for the slow and patient work in the postwar years to tie the former enemies tightly together.

There were other visits that Mr. Reagan

might usefully have made. He could have gone, for example, to the concentration camp at Dachau as a gesture of support to all those Europeans - many Germans prominent among them — who are determined not to let time diminish the lessons of the Nazi period.

But Mr. Reagan has chosen to follow the practice of other American presidents and avoid the sites that evoke the most painful recollections. Presidents are usually optimists who prefer not to dwell publicly on the dark side of politics and human nature. Mr. Reagan is going to Europe to celebrate the industrial democracies' present unity and the world's hope of prosperity. Strasbourg is just the place in Europe for such a celebration.

-THE WASHINGTON POST.

Stockman and the Farmers

In his present bridge-burning mood, David Stockman is speaking much economic truth. He says that the country has more farmers than it can use, and that they have invested too much in their land and equipment. There are going to have to be large losses, he further says. and some of those farmers are going to have to find other lines of work. But to listen to Mr. Stockman on farmers is to be reminded that good economics is often at war with good politics, and politicians are not always wrong.

The question for public policy is not whether people are going to be pushed out of farming. That has been going on since the years before World War I, and with the steady rise in farm productivity it is not going to stop now. For half a century the federal government has provided shock absorbers to slow this process and to make it less painful. But those shock absorbers are expensive. Mr. Stockman is also right in saying that this forced displacement of labor is the sign of a dynamic economy. Economists usually talk as though people welcomed economic growth. People welcome higher pay for what they are used to doing, where they are used to doing it. But economic growth strikes a much harsher bargain. It makes a society richer, but only by requiring people to leave their accustomed ways of life. It imposes immense strain on the people directly caught in it.

Governments, including the one in which Mr. Stockman is a prominent figure, try to

hold a balance. If they try too hard to stave off change with regulations and subsidies, the economy stagnates. If change proceeds too fast, they risk social explosion. That is what happened in Western Europe in the late 1960s. After two decades of the fastest economic growth in European history, a spontaneous rebellion against growth erupted with riots and strikes in France, massive demonstrations in Italy and a surge of terrorism in both Italy and West Germany. But not in Britain, where growth rates had remained low. The emphasis Europe has since shifted to social stability.

That is why the European Community, with a labor force just about the same size as that of the United States, still has more than twice as many farmers. And that in turn is why the Europeans now have vast, unmanageable and unsaleable agricultural surpluses representing a tremendous waste of labor, tolerated for social reasons but imposing a severe penalty on the economic progress of EC nations.

Mr. Stockman advocates doing away with the shock absorbers. Here he speaks as a true economic radical in behalf of pure efficiency. But that is a pretty brutal prescription. The American practice is to do enough to avoid widespread despair throughout the Farm Belt, but not nearly enough to hold all the present farmers on the land. Farm policy is one area of government in which half-measures work best.

- THE WASHINGTON POST.

Other Opinion

Justice, Yugoslavian Style

The best analysis of the celebrated dissident trial that concluded earlier this month in Belgrade came from a diplomat: "The authorities have retreated some, but it doesn't mean the cause of human rights has been advanced."

Yugoslavia has extraordinary problems in this, the fifth year since the death of Marshal Tito. The centrifugal force of its fiercely proud, jealous and quite independent republies and autonomous regions places at risk the nation that they constitute. These tendencies are magnified by the deteriorating economic situation. There is fear, some of it justified, of external exploitation of those internal stresses both from the Soviet Union in the East and from Western, anti-communist emigré groups.

The difficulties of the situation have encouraged leaders to respond to challenges with cannons when flyswatters would serve. Six persons were originally charged with conspiracy against the state. In the end, three stood trial on the lesser charge of generating "hostile propaganda." The trial of two others is pending. Charges against the sixth were dropped.

The openness of the trial was welcome. But the conviction of the three defendants, and the sentences ranging from 12 to 24 months, left an impression that intimidation of free discussion was intended, however open the trial. These three men were guilty of making insult-ing references to the ruling Communist Party and had even said things defamatory of Tito, according to the presiding judge. What they insisted were scientific writings were, the judge found, merely "political tracts."

There were encouraging elements, however.

Some intellectuals in Yugoslavia have resumed the private meetings in apartments, and the led to the original complaints in this case. And Milovan Djilas, the celebrated former associate of Tito, whose subsequent criticism led to the trial and speak freely to correspondents.

If the trial marks the ascendancy of hardliners, that would bode badly for Yugoslavia. If, as many judge, it represents a cautious move toward liberality, that could serve the nation well. Its problems will persist if thought is strangled by some of Tito's heirs.

- The Los Angeles Times.

A Disastrous Adventure

By the end of the summer and for the first time in three years there should be no Israeli troops left in Lebanon. What will "Operation Peace for Galilee" be seen to have achieved?

The Palestinians suffered a major setback, it is true. But they have not been destroyed and the threat they pose to Israel is not significantly less than it was before the war began. Lebanon, on the other hand, far from becoming the friendly, well-governed neighbor that Israel wanted, is now hopelessly fragmented: ungoverned and ungovernable. In most situations it is Israel's enemy, Syria, which calls the tune in that war-torn country.

We are witnessing the final stages of the most disastrous adventure in Israel's short history. The hope must be that Israel will have learned the lesson that not every problem can be resolved by resorting to arms.

- The Sunday Telegraph (London).

FROM OUR FEB. 19 PAGES, 75 AND 50 YEARS AGO

1910: 'Not Dead Yet,' Mayor Says NEW YORK — Mayor William Jay Gaynor has shaken up things in such a fashion in the last few days that the rumor was started that he had been assassinated. The report originated with newsboys, who, in endeavoring to sell their papers, raised an alarm about the time that crowds were "en route" to the theaters. A storm of indignation over the deception followed. It was found that the papers contained nothing alarming about Mr. Gaynor, who was besieged by telephone inquiries at his residence. He replied that he "was not dead yet." The mayor has been busy cutting off official heads lately. He has removed the Aqueduct and Water Commission, and, declaring that two million dollars in salaries has been wasted, he has appointed a new commission. He has

also opened war in other directions.

1935: Nazis Execute Women 'Spies' BERLIN — Glaring red posters bearing the signature of the public prosecutor on the kiosks of this city notified staring groups of Berliners of the grim fact that, for the first time in a period of peace, two women — Fran Benita von Berg and Fran Renate von Natzner — were beheaded by axe [on Feb. 18] for a crime other than murder. They were found guilty of military espionage by the Nazi revo-lutionary tribunal, the People's Court. The cryptic official announcement simply stated that the judgment against the two women was carried out "after the Leader and Chancellor had made no use of his right of pardon." "Everybody who commits treason against the Fatherland must be completed expunged from the commonwealth," says the "Nachtausgabe" commenting editorially on the executions.

By Flora Lewis

P ARIS — There is perverse com-fort in the Worldwatch Institute's new report on the "State of the World." This is a case where words, if heeded, can weigh against those appalling pictures of people dying in East Africa.

The urgency, the immediacy of those pictures drain the spirit and compound the sense of impotence. Of course relief must be sent And of course it is a stopgap, a puff on a vestigial little spark of common humanity that can be bellowed into guilt or hardened righteousness. The Worldwatch report has the

courage to take a cool, scientific look at what is happening and try to figure out the causes. Blame is pointless. There is a vicious cycle to which all have contributed, even some who with the best of good will helped reduce mortality rates and increase population, helped extend agriculture and deplete the soil, helped increase industry and ruin agriculture, and so on.

The comfort comes from evidence that we are finally moving on to an understanding of the cycle, that there is no single, simple crash solution such as zero growth, computers, politics or such. And with that understanding comes new evidence that the cycle can be reversed in a self-reinforcing way. Down cycle: Start where you will

in Africa. Population explosion is as good a place as any, despite the fact that the continent has a scant population compared with other parts of the world. But the fact that it is growing so fast has led to overgraz-ing and deforestation.

The removal of ground cover causes rain to run off, which re-

duces evaporation into clouds, which aggravates drought. In other parts of the world, the use of fossil

fuels increases atmospheric carbon dioxide, which raises global temperatures, which helps cold lands but makes hot ones less productive. It also kills forests, through acid rain, which adds to the carbon dioxide level because the greenery cannot absorb it for new growth.

Turn the cycle around: Afforestation and serious attempts to reduce population growth have a multiplier effect on each other. They conserve water and help hold down topsoil depletion. It is possible, the report says, to "transform a problem into a productive resource" by planting trees. Energy conservation not only diminishes carbon dioxide formation, it adds capacity in many areas. Using dry statistics, the analysts

confirm good news as well as bad news. In the United States, the technique of "minimum tillage," leaving stubble on the fields, which cuts erosion, has extended to a third of the crop land. In Kenya, with Swedish assistance, a relatively inexpensive soil and water conservation

ever lower food production. How-ever it would take a minimum of 15 years to reach stability. South Korea and China are in-

creasing their tree cover by conscious effort, despite growing population. A watershed reclamation project in Uttar Pradesh, in India, is adding productive land, even per capita. Brazil is heading to reliance on renewable energy resources. Admittedly, this is picking the

raisins out of the pudding. There is

not enough good news about how the world's burgeoning population is doing what is needed to enable our earthly home to sustain us all. But there is now a growing body of knowledge about what should be done, and enough examples to show that it is economically and socially possible. It is not actually being done for simpler reasons than might be suspected — a sheer lack of un-

There is not a global, all-encompassing answer. In some places, ad-vanced technology can make a deci-

derstanding that the issues are prac-

tical, specific and interrelated.

incentives to ordinary, sage hus-bandry could turn things around Nobody has an effective super-theory. This carries the encouraging message that everybody's reason-able contribution can be a real help.

"Ideology is not a substitute for intelligent responsible policies, concludes the director of Worldwatch, Lester Brown.

sive difference. In others, familiar

Pragmatism is the order of the day. Even countries with entrenched ideologies can embrace pragmatism," Mr. Brown adds.

There are needs for long-term, medium-term and short-term measures to deal with famine. There are needs for international programs. national government decisions and plenty of private enterprise.

They must not be allowed to undercut each other. Worldwatch has performed a service not only in warning that the cycle is heading down now, which the daily headlines show, but that going up can be a cycle, too. No effort need be futile.

The New York Times.

program is reversing the trend to Steps Britain Should Take to Prevent a 'Maggiegate'

By William Safire

WASHINGTON — A generation ago, when it was revealed in London that a government minister named John Profumo had lied to Parliament, Harold Macmillan, the prime minister, honorably resigned.

Recently, when it became apparent that Margaret Thatcher's govern-ment had misled or wrongfully kept secret from Parliament some salient facts about a military action in the Falklands war, no minister resigned. But the civil servant who told Parliament the truth was criminally prosecuted for giving military secrets to unauthorized persons."

Here is the story of the potential scandal, which has received little cov-

erage in the United States.

When the Argentine military faunched its unprovoked attack on the Falklands, the Thatcher government and the British Navy responded heroically. News coverage, however, was tightly controlled; no questions were raised when the Admiralty announced that the Argentine cruiser proaching the British landing forces, had been torpedoed and sunk with 368 sailors aboard. After that sinking, all mediation efforts ended.

Some opposition members of Parliament were curious about the timing of that decision, and the location and direction of the Argentine ship, Inaccurate information was given them, perhaps inadvertently.

Last year, a senior civil servant in the Defense Ministry named Clive

Ponting, troubled by the misinformation provided, became the British

equivalent of a "Pentagon whistleb-lower": He slipped Parliament docu-ments that showed the Argentine vessel sunk on a date different from the one the government had stated, and after it had been steaming away from the Falklands for 11 hours. This raised a legitimate question:

Was the sinking a necessary action to protect British lives against a genuine threat, as Mrs. Thatcher maintains and most of the British public fervently believes, or was an order given. in effect, to shoot 368 fleeing Argentinian sailors in the back?

Instead of dealing fully and hon-estly with that question, the govern-ment dealt with the whistleblower. The attorney general tracked down and indicted Mr. Ponting for violating the Official Secrets Act (the shame of Britain's legal system and a law that some insecure Pentagonians want the United States to emulate). Last week, 12 good Britishers and true defied the judge and unanimous-ly acquitted Mr. Ponting. Like Nelson at Trafalgar, the jury at the London court expected the

civil servant to do his duty.

Mrs. Thatcher now claims she was out of town and knew nothing of the infamous indictment, for which her Labor opposition all but called her a liar. But the essential point is not what Mrs. Thatcher knew about the

indictment and when she knew it. Nor is it whether the far-left, isolationist opponents of the war have ulterior political motives for raising the issue: Of course they do. The point is this: Why is the

Thatcher government unable to give Parliament, and the world, a full account of its sink-the-Belgrano decision? Who was responsible for, and out and the misleading information fed to Parliament that now raises suspicions of a deliberate cover-up? Can the government that failed to jail its accuser credibly investigate itself, or is a Royal Commission called for?

When Mrs. Thatcher comes to

Washington this week, perhaps she will have frank answers to questions on the minds of those who are not ber professional detractors. As one who cheers the Conservatives, jeers at the nuclear kookiness of Labor, and rooted for Britain against the Argentine junta, may I suggest a lesson learned here a decade ago that might help avoid a "Maggiegate";

It is not so much the original mistake, if such there was, that gets you. It is the initial refusal to admit any error at any level, followed by your indignation at the prying of those election-reversing opposition politicians and sensation-seeking journalists who you are sure want only to besmear you for their own ends.

This self-righteousness leads to the

ed Kingdom is not the United States, but public opinion in democracies tends to think that wherever there is cover-up, there is something to hide.

The Economic Noose Tightens for Farmers in U.S.

By Ward Sinclair

W ASHINGTON — "They told me to call," the conversation begins, almost without fail. The voice usually is tremulous and uncertain, crackling in from a recon-dite corner of rural America, reaching out to a big-city newspaper for help or just a word of reassurance.

Short of a trip to the midlands, where farmers are holding protest rallies and blocking foreclosure sales, the long-distance telephone easily is becoming the simplest, quickest way to assess the stress and the economic pain that are besetting

farming communities in America.
"They told me to call," it begins.
The undefined "they" is an Americanism for gaining entrée. It is the spurned farmer's idiomatic way of saying he is at his wit's end and that maybe, through a newspaper, he can get the attention of officialdom.

One day it is a farmer from Montana, urging the paper to investigate the policies of the Farm Credit System. Another day it is a farmer's wife from Ohio, wanting to know how to escape the tightening eco-nomic noose. Minnesota is calling now, a café owner saying that her town is going to pot and that outsiders seem not to care. Off and on for three years these

calls have come to the newspaper as the farm economy has continued on its rocky course, despite federal farm-program spending of more than \$30 billion. It is as though the money has made no difference. In the beginning, most of the callers complained of problems in getting loans from the Farmers Home Administration (FmHA). But now, as credit pressures have

reached beyond those borrowers of last resort who deal with the FmHA, the calls come more frequently, an average of perhaps one a day, stranger reaching out to stranger for the kind word or the bit of advice that might save a farm. The people who call now increasingly are farmers or farmers' wives who fit somewhere in the middle

section of American agriculture -

full-time family farmers who rely

entirely on the soil to sustain them-

selves. Of the country's 2.4 million

'Okay, bring on the sacred cours.'

Increasingly, the calls are weight-

ed with anxiety. The voices speak of fear of the future, disillusionment with government, and desperation over the prospect of losing a farm that has been in the family for generations. Young farmers, particularly, in a credit bind because they owe too much, get on the phone. They tell of country banks that

are tightening the credit screws, darkening the hope of financing a crop for one more year. They talk with concern about what is happen-ing to their country communities. where they will go and what they will do if the farm fails. Newspapers, for all they are

cursed and for all they are distrusted, always have been this society's traditional, informal court of last appeal. When the congressman will not, when the FmHA supervisor laughs the farmer out the door, when the bank turns a cold shoulder to the loan applicant, the telephone calls start coming thick and fast. Those calls often mean that the

system is not working, is not responding as it is supposed to. When a farmer is rejected by the FmHA. he is supposed to be told why and he is supposed to be told that he has appeal rights. Often he does not know of this until too late, and then he phones the newspaper. If today's calls mean anything, there is mas-sive systemic failure and paralysis in the institutions designed to serve the agricultural sector.

The small farmers do not call. Statistics from the Agriculture Department say that most of these small operators subsidize themselves with off-farm jobs.

The big farmers tend not to call. either, although many of the biggest operators who produce the bulk of the country's grains have credit problems as well. Perhaps too proud, perhaps able to find other financing, they do not call.

"These people won't give up the land," a woman from the Midwest said the other day. "(If) they give up the land, they give up their homes There is nowhere to go. They won't allow themselves to be forced."

Another caller talked of plots and with more and more frequency. there is a belief that a great conspiracy is working to wrest the land from the little people and concen-trate it in the hands of the wealthy. True or not, the belief is there and it is a powerful force in the country. The dairy farmer from Ohio is a

regular. Last June, the state office of the FmHA approved the loan re-quest that was denied at the county evel. The money did not come FmHA said it would be October and then January. It did not come FmHA then said it would be early February. That was changed again to mid-March, almost 100 late to meet his spring planting needs. He may get the money or not.

A 60-year-old woman called from Minnesota, nearly in tears. With fear-struck voice she told of the imperiled family farm, the disabled veteran son who cannot get government help, her small-town café about to go broke, her congressman's secretary rude and unhelpful.

"Where will we go? What will we do?" she pleaded. "What will happen to this town? All the farmers do is sit around and drink coffee. Yesterday was Sunday and you know how many meals I served? Three breakfasts and one dinner. All the rest was coffee. We can't make it serving just coffee," she said. "They told me to call you," she

had begun, but there was little to be said in reply. It hurt all day long. The Washington Post.

By S. Stanley Katz

MANILA — From the Trojan Horse of antiquity to America's involvement in Vietnam, governments have distinguished themselves by an ability to pursue policies con-trary to their national interests. Barbara Tuchman, Pulitzer Prize-winning American historian, describes this in "The March of Folly."

A prime example today is the

West's non-response to profound economic changes in the Asia-Pacific region. Asia's GNP is growing by 6 percent a year, and trade and finance even faster. Its businesses are both able and competitive. But the continent's move toward

the center of the world economic stage is hardly reflected in Western policies and programs. The West should be assessing what Asia's as-cendancy will mean for its own national economies in terms of growth, jobs, exports, imports, joint ventures, licensing agreements, financial flows, and pressure on currencies. And it should be shaping policies to ensure that Western economies share the benefits of Asia's economic dyna-mism. But apart from an occasional conference on whether to call it a Pacific basin or a Pacific rim, there is little analysis of Asia's strength.

The contrast between America's role as impressario of global economic recovery in the 1950s and the walkon role the industrialized West is playing in Asia's development in the 1980s could not be more striking. Rather than searching out solutions to today's international financial and economic problems, Western nations seem to be looking the other way.

Rather than strengthening the instirutions they created to bring capital and development together, their support is waning. And programs to educate Asia's future leaders in American and European institutions have all but vanished. At a time when increased exports are vital to Asia's growth, access to markets and trade financing is being curbed. Only Japan, at the hub of Asian

expansion, seems to have a clear fix on Asia's future role in the global economy. And by its active and visible support for the development aspirations of its neighbors, Japan is en-suring itself a key role in Asia's coming era of economic ascendancy. Western industrialized countries would do well to follow Japan's lead.

For example, Western nations should upgrade their presence in Asia and attune their economic policies to Asia's development. As a first step, they must realize that economic development, not military hardware, is Asia's top priority. Asia's leaders see an expanding economy as their best bope for higher tiving standards, so-cial justice and political stability and, therefore, as their best defense.

Commerce - exports, imports, finance and investment - presents virtually unlimited opportunities for an increased Western role in Asia. Moreover, nothing would ensure the West a greater stake in the region's economic future than opening up markets for Asian products. Asia will also need vast amounts of capital investment and imported goods and services to fuel its economic drive. Private investment by Westerners could advance the region's economic development objectives and ensure Western participation.

Exporting to Asia will depend increasingly on contacts and credit. Western countries could take another leaf from Japan's book by sending more frequent trade missions to Asia with competitive financing proposals. Whereas U.S. officials who visit Asia usually leave behind mutual security agreements, Japanese officials leave behind lines of export credit.

The extent of Western participation in Asia can also be measured by multilateral development institutions, namely the International Monetary Fund, the World Bank and the Asian Development Bank. These institutions loom large in Asia and their activities are monitored by govern-ments. Increased support for Asia's development institutions would enhance the industrialized nations' role

in the continent's economic growth.
Scholarships for Asia's future leaders could again, as in the past, increase the West's role in Asian development. Few activities can make 50 fundamental a contribution to development or forge such long-lasting links with Asia at so little cost.

It is economic folly by the West to pursue policies essentially oblivious to the economic changes now taking place in Asia. The Asian nations themselves are increasingly looking to the West as their model for future economic development. They need the West's guidance and help in mov-ing toward that goal. This plea to the West offers an unparalleled opportumity to bring Asian nations to the free market side of the East-West economic ledger. To grasp this opportu-nity would be a major strategic achievement for the West. To fail to do so would constitute the first chapter of a future "March of Polly."

The writer is vice president, finance and administration, of the Asian Development Bank in Manila. He contional Herald Tribune.

LETTER

World Arms Spending

In "Middle East in Arms: Swelling Armies Lead the World in Weapon! Imports" (Jan. 29), David Lamb notes that "the region has less than 3 percent of the world's people, yet accounts for more than 8 percent of the world's military spending. Could someone give me comparable figures on U.S. population and percentage of world military spending?

Pretoria Drops Charge By the That Catholic Bishop Defamed Police Unit had correctly quoted Arch Hurley as saying that "y counth-West Africe

The government dropped a criminal case Monday against Archbishop Denis Hurley, a prominent antiapartheid campaigner and South Africa's leading Roman Catholic cleric, saying the charge that he had defamed police was based on hear-

Among Archbishop Hurley's 3 Killed in Disturbances supporters in the courtroom when he announcement was made were Bishop Desmond Tutu, the black Anglican bishop of Johannesburg who won the Nobel Peace Prize last year, and several overseas represen-tatives of the Roman Catholic Church. Spectators broke into applause when the charge was

Archbishop Hurley, 69, president of the Southern African Catholic Bishops' Conference, was accused of making false accusations against the police at a press conference two years ago. He had said he welcomed the trial because "a lot of dirt will come out."

The archbishop had accused po-lice of brutality against black vil-lagers in South-West Africa, or Namibia. The case against him was widely seen as part of a government effort to quell criticism from the churches, which have played a principal role in opposing the white-minority government's policies of apartheid

It is a crime under South African law to make false statements against police.

Frans Roets, the regional prosecutor, said in court that an investigation showed the allegations against Archbishop Hurley were based on hearsay, and that the state, therefore, did not wish to proceed with the case.

Denis Kuny, the archbishop's lawyer, said it was unfortunate that the state needed nearly two years to learn that its case was based on hearsay evidence.

The charge, filed in October, followed Archbishop Hurley's remarks alleging that a South African a harsh critic of the U.S. involve-police unit in Namibia had committed atrocities against black villagers. His statements were based on a church investigation into the United States. conduct of South African military and police units in the war against guerrillas in the terrority, which is under South African control.

Mr. Roets said the state initially could find no recording of the press conference in February 1983 and

had correctly quoted Archbishop Hurley as saying that "security forces in South-West Africa (Namibia) were still perpetrating atrocities against local blacks."

But the state recently acquired a tape recording of Archbishop Hur-

ley's statements, and it showed dis-crepancies with the reporter's version, Mr. Roets said.

Three men were killed in violence in the Crossroads squatter city Monday amid rumors that the government was about to start moving residents to a new site, The Associated Press reported from Cape Town, quoting police

Gerrit Viljoen, the South African minister of state administration, denied "in the strongest terms' that the forced relocation of 60,000 or more Crossroads residents was imminent, saying, "I want to repeat my undertaking that notice will be given timeously of any steps envisaged in this regard."

Rumors that trucks and work crews were being massed to begin the removal of people from the camp near Cape Town led to the

Egyptian Air-Defense Unit in Sudan Being Withdrawn, U.S. Sources Say

Washington Post Service
WASHINGTON — Egypt has

decided to pull out an air-defense brigade that it sent to the Sudanese capital of Khartoum in March after an attack on the city by a Libyan bomber, according to Pentagon and State Department sources.

The remnants of the brigade are scheduled to leave by the end of this month following the failure of Egypt and Sudan to set up a permaneat air-defense system for the cap-ital, according to the sources.

apparently purely for military rea-sons, comes amid increasing divi-sion within the Egyptian govern-ment over its policy toward Sudan and how close Cairo should continue to associate itself with the Sudanese president, Major General Gaafar Nimeiri.

Egyptian officials in interviews in Cairo last month made clear that the issue was regarded as extremely delicate because of General Ni-meiri's unpredictable behavior and the possibility that he might turn the Egyptians if they pressed might even make an alliance with his chief enemy, Colonel Moamer Qadhafi of Libya.

Press reported from London.] Without Egyptian support, Gen-

eral Nimerri's survival in face of mounting internal opposition to his government appears uncertain. General Nimeiri has survived at

least 20 coup attempts since com-ing to power in a military coup in 1969, and his government is fighting rebel secessionists in the south.
Egypt is bound by a defense treaty to defend Sudan against external aggression. In 1982 the two nations signed an economic integration

The defense treaty does not commit Cairo to help General Nimeiri against internal unrest, but Egyptian military intervention already has saved him from his enemies at least twice - in 1971 against the Communists and in July 1976 against a Libyan-backed insurrec-

A Sudanese government source said that he was convinced that the Sudanese Army no longer fully supported General Nimeiri. "But him too hard. They thought he they want a guarantee the Egyp-might even make an alliance with tians will not intervene if they act," the source said.

tion in the capital.

Qadhafi of Libya. Apparently no such guarantee (The London newspaper The Observer has reported that Libya cause Egyptian and U.S. officials

and Sudan are conducting secret talks on ending their support for each other's rebels, The Associated scene.

The officials admit however Sudan have become delicate and that Sudan has become a foreign policy preoccupation.

The fear in Washington is that Soviet-backed Libya and Ethiopia already deeply involved in aiding the rebels against General Nimeiri's government, will both rush to help whoever tries to take his place in a crisis.

One sign of the shifting Egyptian attitude is the increased contacts between Cairo and Sudanese opposition representatives since last

President Hosni Mubarak of Egypt reportedly has been using a "kid-gloves" approach toward General Nimeiri, preaching moderation and reconciliation to him in their frequent meetings.

General Nimeiri's decision on Jan. 18 to hang the 76-year-old leader of the Republican Brothers, a moderate Islamic fundamentalist sect, appears to illustrate that the Mubarak soft line is not working. General Nimeiri appears deter-mined to follow through with the imposition of strict Islamic law in

Lange: No Newcomer to Criticism of, and by, U.S.

New York Times Service WELLINGTON, New Zealand - Prime Minister David Lange, who announced Monday that he will visit the United States next week to explain his refusal to allow a port call by a U.S. destroyer, has been sympathetic to the nuclear disarmament movement for at least

His stance rankled the Reagan administration and won worldwide acclaim from anti-nuclear groups. but it is not the first time his outspoken stands on issues have irrinated U.S. officials.

In the mid-1960s, Mr. Lange, then a crusading liberal lawyer, was ment in Vietnam, Later, apparently in response to his anti-war activities, he was denied a visa to the

Yet the prime minister's decision to ban a port call by an American warship unless the New Zealand government was assured it carried no nuclear weapons was less a matter of long-held principle than political pragmatism. And it has been based its case on a South African news agency report. The reporter later filed an affidavit saying he that largely explain his rapid rise to the marketplace.

David Lange

power since entering Parliament in

Moreover, Mr. Lange has led the seven-month-old Labor government on a surprisingly conservative path in the key area of economic policy. To the delight of the New Zealand business world, he has proven to be an advocate of free enterprise and less government in

the political mainstream, a nearly 2-to-1 margin.

The public response to this decision has been very positive for the government." said Mr. Lange. "It has set off an upsurge of nationalism in New Zealand.

The prime minister's office says mail on the subject is running 95 percent in favor of the ship ban, and 15,000 people in Auckland recently supporting the move. The Swedish Peace and Arbitration Society. Sweden's largest anti-war organization, has nominated Mr. Lange for a Nobel Prize.

Mr. Lange has been portrayed of late as an idealist willing to stand up to a bullying nuclear superpower. But, in fact, the prime minister tried to revise the Labor Party's hard-line ship ban policy in March 1983, less than two months after he became the party leader. At the time, he considered the rigid antinuclear stance understandable, even admirable, but "unrealistic."

Faced with a near-revolt in his party. Mr. Lange pragmatically changed his position. By election

mosques in the city, he estimated

that the Israelis had expelled about

40 percent as the resistance to their

occupation grew. He nodded as he was told him

what had just happened to Mr.

"Each Moslem is part of the Is-lamic resistance," he said. "We are with everyone who is against Israel

and against everyone who is with

But the rejection of ships capable time last year, he espoused a "nonof carrying nuclear weapons is now negotiable policy" that neither nuclear-armed nor nuclear-powered certainly in the Labor Party, which ships would be permitted in New won the general election in July by Zealand ports. The United States, as a matter of policy, refuses to say whether its warships are carrying nuclear arms.

> Mr. Lange, 42, was raised in liberal Methodist household where the children were drilled with the values of charity and duty.

After receiving a law degree from Auckland University, Mr. Lange went to work for a law firm in Auckland that seemed to specialize in clients once described as "the real down-and-outs."

Mr. Lange won a seat in the House of Representatives in 1977. In Parliament, his skills as an orator gained him national recognition at a time when the Labor Party was in need of fresh leadership.

It was on the issue of leadership and the economic policy failures of Sir Robert Muldoon, the previous prime minister, that Mr. Lange's successful campaign last year was

Mr. Lange's election marked the passing of power to a young generation of leadership in New Zealand. He is 22 years younger than Sir Robert, and the members of the Labor cabinet are mostly in their 30s and 40s. Their views on domestic issues are more liberal and, in-American than their predecessors.

ARTS/LEISURE

Ex-Eagle Making Solo Flights

D ARIS - Don Henley, drum-I mer and vocalist with the disbanded megagroup The Eagles ("Hotel California," which he cowrote), recently released his second solo album, "Building the Perfect Beast," which deals with ecology, spiritual values and politics. It has sold 800,000 copies, a number Henley describes unenthusiastically as "all right," explaining: "I only break even at 750,000.

In Los Angeles, he climbs into his car, shoves a work tape in the eryday, run-of-the-mill beach boycassette machine, turns up the volume and cruises around, making up his songs. "It's the perfect working environment. The phone doesn't ring, the scenery keeps changing. I get a lot of thinking done in a car." He speaks with nostalgia about the fast lane: "You can drive 100 miles an hour from the little town I come from back in Texas, to Dallas, 160 miles, and not see one cop, not a curve in the road. I need space, I miss that in Los Angeles."

He is "involved with" the American Rivers Conservation Council, the Wilderness Society, the Sierra Club and the American Farmland Trust and he is suing the city of Los Angeles to try to stop developers from blighting the hills, as he sees it, with condominiums.

"America runs on greed," he said last week during on a promotion tour to break "The Perfect Beast" into the European market. "Some-day it's going to turn the whole place into a desert. We've got to think of quality of life, not quantity. America is obsessed with more and bigger. It's got to stop some-

Writing songs about ecology for an album that only breaks even at 750,000 copies while driving aimlessly around polluting the environ-ment is a classic California contradiction. And the blond, lean Henley, with his sexy drawl and solid cleft chin, is on the surface a classic California rock star, a breed that presumably thinks only about parties, getting high and buying

fashionable.

Although some people are allergic to wool or synthetics, cotton, the cheapest natural fiber, remains a year-round favorite for regulating body heat. Worn under a layer or two of wool, it provides extra warmth. But it leaves the wearer feeling cold and clammy if much physical exercise is undertaken.

Wool underwear can be pure sheep wool or combinations such as angora and wool or wool and silk, program at the International Television Festival here.

Winter Underwear Goes Fashionable more expensive than cotton, but less expensive than pure silk: A long-sleeved undershirt for women runs \$20 to \$30.

Underwear wool is merino, sheared from a finewool family descended from sheep introduced in Spain by the Moors. Unlike coarser wools, merino has a higher number of crimps (or succession of waves) per inch, a denser fleece and a finer diameter.

"Long" underwear still keeps a body warm during cold spells, but it is not necessarily long and is not A knitted wool or wool-based fabric contains millions of air pockets, making up as much as 80 percent of the volume of wool fiber. Wool reputedly can always hidden under layers of outerwear. It comes lace-trimmed and décolleté in fine wools and silks for absorb a third of its weight in body moisture. high-fashion women in synthetic blends that have

For more than 500 years - since the merchants of kept climbers cozy on Mount Everest and in space-age Lyon decided to concentrate on manufacturing finequality silks instead of peddling Italian silks - France has been a center of silk production. But the industry Designed for winter sportsmen, sufferers of arthritis took on new life in recent years as consumers looked and rheumatism and people who cannot or will not for ways to beat high energy costs and also became more active in winter sports.

Always a top-of-the-line item, a simple silk "thercludes classic long- and short-sleeve T-shirts, lace

carnisoles, unisex tights, girdle-like warmers for the mal" undershirt retails for \$30 to \$40. Lower in lower back and stomach, shoulder warmers, boxer density than cotton or wool, it is more moistureabsorbent and heat-resistant than wool.

"In the last two or three years there has been an Both silk and wool thermal undergarments are light evolution, with more modern styles and an increase in enough to wear under body-clinging fashions. French women traditionally avoid bulky layering in drafty sales. Even old people want to be stylish as they stay warm," said Henriette Simonnet, a veteran coldoffices or restaurants by wearing a thin silk or woo undershirt under a silk or cotton blouse. weather-underwear saleswoman at a major depart-

When it comes to price and sales volume, the No matter what the fabric, the principle is the same: synthetics are king. One of the giants in the field is helping the skin regulate body temperature.

"It is necessary for the body to keep a constant temperature. In cold weather the body must work to Damart, which is listed on the French stock exchange and whose products are sold in France, Britain, Spain West Germany and Italy, with annual sales of well keep a temperature around 37 degrees centigrade [98.6 over \$100 million. Begun in 1855 to manufacture menswear fabrics, Damart moved into synthetics in Fahrenheit while also working for whatever activity the body undertakes. The energy expended is much 1950 with a knitted chlorofiber. A synthetic Damart greater." said Alan Nys, a sports medicine specialist in undershirt retails for less than \$10.

The synthetic (abric helps insulate the skin against cold and promises to raise body temperature several

degrees through a kind of massaging action.
In the United States, cotton thermal underwear is a traditional favorite, with wools and particularly silks considered luxury items. But recently physical fitness cuthusiasts have moved into so-called space-age fabries, such as polypropylene. Dr. Arnot, who encourages year-round outdoor exercise, says the new fabrics make it possible "to create your own micro-environment." In polypropylene underwear and headgear, body moisture is pulled to the surface of the fabric. where it is evaporated, instead of making the body feel cold and clammy. An undershirt of this fabric costs

In Europe, where thermal underwear is often considered a pharmaceutical or orthopedic item, claims are made about aiding rheumatism and arthritis sufferers, bronchial patents and those particularly sensi-tive to cold. The French Ministry of Social Affairs said in 1983 that a blend of merino wool, angora and synthetic libers eased certain rheumatic complaints by contributing to body heat.

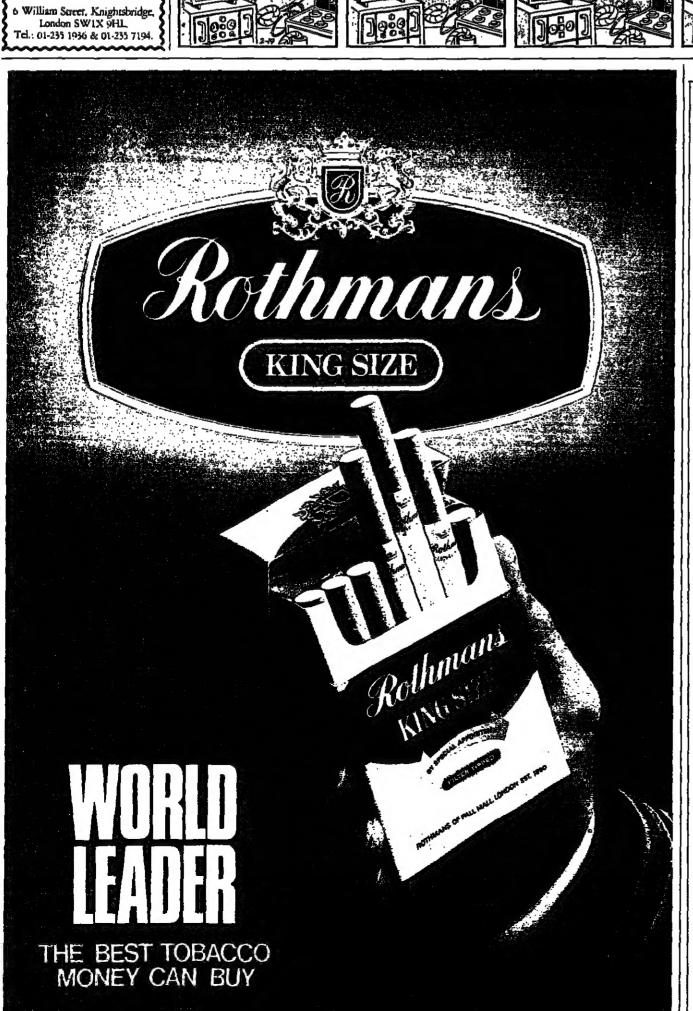

Dr. Nys said his fellow Frenchmen liked the idea

that thermal underwear could somehow make them healthier. Whatever the scientific basis for such claims, thermal underwear does help circulation and makes people more comfortable against the shock of bitter winter cold, he said.

FUTURES AND OPTIONS

NYSE Finally Warms Up To Stock-Index Market

By H.J. MAIDENBERG

New York Times Service EW YORK - When stock-index futures were introduced three years ago this week, the New York Stock Exchange shrugged them off, as it had the new equities options 10 years earlier. That attitude persisted even after the more successful index options, also based on Big Board listed issues, began trading in 1982.

Especially puzzling to many in the industry was that the Big Board's attitude did not change after it subsequently opened futures and options markets on its own composite index. If fact, most news of its index market, the New York Futures Exchange,

The options market

on the composite

growing steadily.

index has been

the past year has concerned the Big Board's efforts to get its offspring off the premises and married somehow with one of New York's commod-

ity exchanges.
"All this is now past history," said Ivers W. Riley, executive vice president in charge of options and index products

· · · · · ·

at the Big Board. "While we still would like NYFE's floor space for our new stock-options market, we are very much committed to our index-options market."

Indeed, the options market on the Big Board's composite index of about 1,500 stocks, which opened in September 1983, has been growing steadily. Last month, for example, average daily volume was up 40 percent from the 1984 level, despite the slow acceptance of the exchange's "jumbo," or double, index option introduced last July.

ong Gone ashional Moreover, Mr. Riley noted that his exchange was seeking approval from the Securities and Exchange Commission to trade index options based on stocks of technology companies listed on the over-the-counter market.

> A S for the SEC's approval last Wednesday of the Big Board's plan to trade stock options, Mr. Riley said he did not expect the first such contracts to be picked and ready for trading until late in the year. The Big Board cannot trade stock options already traded on other exchanges, he said.
>
> Mr. Riley emphasized that the Big Board will continue to strengthen its index-options market "because index options have

> only now, and I emphasize the 'now,' become vital tools for institutional investment managers."

> "Until now, few institutions were active in the index-options market and even fewer traded index futures," he said. "Most of the trading was done by individuals and exchange floor traders. Now it has changed dramatically. We see more and more institutions participating in the index-options market."

> Specifically, he said, "institutional portfolio managers have taken to writing, or selling, call-index options when they sense the market is topping out after an advance. By selling calls, they can hedge against a market decline as well as earn the premium income and continue to receive dividends on their holdings. Also, index options often eliminate the need to select which stocks to sell when the market looks like it's about to top out."

By selling a call, the writer in effect offers the buyer of the option the right to buy the underlying "index" at a fixed price within a set period of time. The buyer pays a premium for the option, which may or may not be exercised. If the call is exercised, or called away from the seller, no stock changes hands, only cash

European Computer Accord

6 Firms Seek To Combat IBM

By Bob Hagerty ternational Herald Tribuni

LONDON - Six West European computer makers, banding together to resist the market dominance of International Business Machines Corp., announced Monday an agreement to set common standards for development of software used on their equipment

The six said they would promote standards for the use of the Unix operating system, developed by American Telephone & Telegraph Co. An operating system coordinates the software and hardware resources of a computer system.

The companies are Nixdorf Computer AG, Ing. C. Olivetti & Co., Siemens AG, NV Philips. France's state-owned Bull, and ICL, which was acquired last year by Standard Telephones & Cables PLC of Britain.

The agreement came after a series of talks among the companies

that began last June.
"They are really facing a tough,
uphill battle" in competing with IBM, observed Mike Rappolt de-velopment director of the Londonbased consulting firm PActel, "and it makes sense for them to come together." But, he cautioned. "The history of such European cooperation is not a happy one."

All six European companies al-ready are developing computer sys-tems using Unix, as is IBM, which offers the AT&T product as well as other operating systems. The European project is aimed at ensuring that a European standard will quickly develop and at giving software producers a lead on how to develop programs suitable for use on systems sold by all the major European companies.

"We're looking for a homoge-neous marketplace," said Keir Hopkins, ICL's director of international network services and the chairman of the European project. The coordination should reduce IBM's competitive advantage by offering users the chance to choose another widely established operating system with a plentiful supply of software, he said.

The six companies are putting together small task forces to put their plans into effect, the ICL exaid. There will be mai organization to promote the coordination, he said.

Logica PLC, a big London-based maker of software, enthusiastically welcomed the long-rumored coordination. Hector Hart, commercial manager of Logica's software products group, said companies developing software would view the common standards as vital infor-

Heavy Buying In Europe Sends Dollar Higher

LONDON - The dollar was nigher Monday after an active day that saw heavy speculative and corporate demand despite a holiday closure of U.S. banks. The dollar stood at 3.2788

Deutsche marks in late trading. above the opening at 3.2548 and up from Friday's 3.265. Dealers said European operators saw Friday's softer levels as a buying opportunity and the slide late last week as a temporary interruption to a strong upward trend.

The pound ended at \$1.0935, down from \$1.1025 Friday. The dollar rose to 2.8015 Swiss francs from 2.7805 and was at 10.04 French francs, compared with 10. It was down against the yen, 256.575 against 259.225. London dealers said the dollar's sharp movement was exag-gerated by a thin market in late

A family in Renhe, in China's Sichuan province, displays its stores of grain.

A Record Crop Is Changing China

By John F. Burns
New York Times Service
CHONGQING, China — In Reuhe township, an hour's bus ride from this teeming south China city, Chen Yanhuan and his family have stores of rice brimming over the sides of the cypress-wood coffin that sits in the bedroom of their mud-brick

Mr. Chen's widowed mother, Zhu Shuhuan, who is 64, bought the coffin a few years ago for the day when she will be laid alongside her ancestors. But last year the family's rice surplus overflowed the giant earthenware vats and wicker bins ordinarily used for storage, so the coffin was pressed into

More than six years after China's 800 million peasants were released from Mao Zedong's collectivized system of agriculture to work the land as families, they are running into unfamiliar prob-lems. Suddenly, in places like Renhe all across the

country, there is relative abundance where famine or privation had prevailed for centuries. Last year, officials in Beijing announced that the grain harvest exceeded 400 million tons, a record accomplishment that they said made China selfsufficient in its staple food for the first time in

history.

This was not good news for everyone. For the United States and other grain exporters, it meant shrinking prospects in what has been one of the world's largest markets. In the past two years, China bought 4.2 million tons less than it had contracted to buy from U.S. farmers under a fouryear pact stipulating a minimum annual purchase of six million tons.

China also cut back other agricultural imports, such as soybeans. And when the United States imposed new textile-import restraints last summer, the Chinese shunted some food purchases to other

U.S. Firms' Profits Flat in 4th Period

By Nicholas D. Kristof

New York Times Service NEW YORK — Solid economic growth continued to bolster corporate profits in the fourth quarter, but the rising dollar on currency markets took a toll on profits in industries that depend on exports or compete significantly with im-

Overall, after-tax earnings prob-ably were about the same in the States, but earnings were most profourth quarter as in the third quar- nounced in the first half of the year ter, after adjustment for seasonal when economic growth was stron-differences. But they were still high gest. Profits declined from an anby historical levels, not much below mual rate of \$150.6 billion in the 32 percent, in part because of the record set in the first quarter of first quarter, to \$150.2 billion in the strikes late in the year. 1984 when the economy was roaring ahead at an annual growth rate

of more than 10 percent. According to a compilation by The New York Times of fourthquarter earnings reports from 247 companies. 129 of them showed improved profits compared with the equivalent period a year earlier (including 13 that were in the red in the 1983 period), 72 showed a de-cline in profits, 3 were unchanged and 35 posted a loss. No comparison could be made for 8 companies.

"Profits were held down in the fourth quarter by price weakness," said Roger E. Brinner, chief economist of Data Resources Inc., a consulting company based in Lexing-ton, Massachusetts. He noted that part of the weakness in prices was the result of competition from a deluge of less expensive imports.

Mr. Brinner also noted that gains in productivity slowed as the economy left the recession further and further behind. That means that labor unit costs rise at almost the same rate as prices, curtailing profit growth.

Many industries felt the impact

BIS Figure On Bank Loans Revised Up 14%

By Carl Gewirtz International Herald Tribune

PARIS - International bank lending at the end of 1983 has been revised upward by 14 percent, or \$155 billion, the Bank for Interna-tional Settlements reported Monday, due to a new, wider data base

Lending to countries in Asia registered the biggest change, a jump of 64 percent to \$81.7 billion at the end of 1983 from the \$50 billion previously reported outstanding then. Total lending to Asia in-creased further to \$82.6 billion by the end of the third quarter of last year, the period covered in this lat-est quarterly analysis of interna-tional banking by the Basel-based cent for the Middle East, in addiinstitution.

The BIS is commonly thought of as the central bankers' central

The revisions show that loans to Malaysia at the end of 1983 were 89 percent greater than previously estimated, at \$11.4 billion — a total which rose to \$11.7 billion by last The increase for the Philippines

was 70 percent, to \$13.67 billion at the end of 1983. By the end of the third quarter, its bank debt totaled \$13,72 billion.

The other big jump, 52 percent, was for South Korea — to \$29,26

billion by year-end and to \$30.2 billion last September. The revision for Papua New

Guinea, up 220 percent, was the greatest although the amount -\$539 million at the end of 1983 was relatively small. Likewise for Sri Lanka, up 122 percent at 5769 million. China's debt at the end of new measurement, Thailand's by 69 percent and India's by 57 per-

Lending at the end of 1983 to Latin America was revised upward by almost the same amount, some \$34 billion, but the percentage increase was a much smaller 19 per-

The revisions for Latin America came as much less of a surprise as most of these countries are engaged

discrepancy between the BIS num-bers and the amounts actually being rescheduled has been a matter of record.

The revisions result from the inclusion of data from banks in Bah-rain. Hong Kong, Singapore, the Cayman Islands and the Netherlands Antilles as well as more-complete reporting from banks in Swit-

Lending at the end of 1983 to members of the Organization of Petroleum Exporting Countries was revised upward by 25 percent to \$109 billion. Relatively token revisions of 2.8 percent for Eastern Europe 2.4 percent for Africa textion to the groups of countries already cited, account for \$94.6 bil-lion of the overall \$155-billion in-

The new data also catch a \$62.6billion increase in deposits by this same group of countries - meaning that the revisions for the end of 1983 show their net debt position increased by \$32 billion.

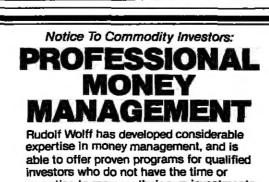

For the third quarter of last year, the growth of international bank lending slowed sharply — a \$10-billion increase compared with gains of \$25 billion in the previous two quarters. Most of the increase, or \$8.5 billion, represented new loans to the major industrialized

The small \$1.5-billion increase in loans to other countries kept the pace of that lending for the first three quarters virtually unchanged from the comparable 1983 period. The BIS noted that the main

feature" of the third quarter was a 1983 rose \$1.5 percent under the decline of nearly \$14 billion in the total external claims of U.S. banks - a reduction of \$17.5 billion in their interbank lines accompanied by \$4-billion drop in their deposits. As a result, the interbank market

which is the base from which the Euromarket does business - contracted by \$6.8 billion, double the previous decline in the second quarter of 1983. And, for the first time since the first quarter of 1979, the gross size of the international (Continued on Page 9, Col. 2) in renegotiating their debt and the

expertise to manage their own investments. Minimum initial investment: \$100,000. Rudoll Wollf, established in 1866, is a member of the Noranda group of companies, a mining and resource group with a net worth of \$2.7 billion.

BUSINESS ROUNDUP

Caledonian Delays Public Share Issue

LONDON - Plans for a public flocation of shares of Caledonian Aviation Group PLC, parent of British Caledonian Airways Ltd. have been postponed, although a share sale is still ultimately intended, Adam Thomson, the company's chairman, said Monday.

Circumstances have changed since the possibility of an offering was investigated last year, he said at a news conference. Caledonian's finance director, Trevor Boud, said later that the group's latest accounts were not viewed as a suitable base for an early share issue.

Pretax profit for fiscal 1983-84. which ended Oct. 31, rose to £15.4 million (about \$14 million) from £3.3 million the previous year. But the latest results were heavily

trading in used aircraft.

MUNICH - Bayerische Motoren Werke AG reported record results for 1984 and expects further records this year, the managing board chairman. Eberhard von Kuenheim, said Monday.

He said at a news conference that profit and tax payments reflect the 18-percent increase in world group revenue last year, to 16.48 billion Deutsche marks (\$5.06 billion).

He gave no 1984 profit figure and he declined to predict the amount of the dividend. The company paid 11 DM, and a 1 DM bonus on 1983 results when world group net income was 292 million DM on revenue of 11.9 billion DM.

Stock-Index Futures Heat Up

(Continued from Page 7) or, in the case of options based on futures, the underlying futures con-

tors did until now, and as a market our prime concern has always been For example, Mr. Riley continued. "We now see our composite [double] index trading at 212,75 and a March 215 call selling at a premium of 2%. At that premium. the seller is getting more than 1 percent on the basket of stocks rep-In Gas Project resented by the index for a period of one month.

What if the index tops 215 before the March option expires?

He replied that obviously the seller faced a loss if the option was called at a higher price than that for which the contract was sold. In this case, the premium income can only cushion this loss. How big a loss depends on how high the market goes during the remaining life of the option and how long the seller decides to sit with it before it ex-

The seiler actually has several choices if the market rises. Aside from buying back his option, the portfolio manager can offset the loss on the option by selling some stocks profitably in the rising market or he can employ index options in a multitude of hedging strategies. Mr. Riley said.

A final point made by the Big Board's options chief was that "despite all the talk to the contrary, we

'Mini-Max' Note Debuts on Eurobond Market

International Herald Tribune
PARIS — A new instrument combining the features of a floating-rate note and a fixed-coupon bond, dubbed the "mini-max" by lead manager Goldman Sachs, made its debut on the Eurobond

market Monday. Superficially, the instrument is a floating-rate note: \$200 million of 10-year noncallable notes for Denmark, with interest set at 3/16point over the six-month London interbank offered rate,

Al PLN98

What sets it apart from standard FRNs is the guaranteed minimum coupon of 10 percent and a guaranteed maximum coupon of 11% per-

Normally, the guaranteed minimum coupon — which is virtually standardized at 5¼ percent — attracts scant attention these days with Libor at 9½ percent. With Libor at that level, a minimum of

10 percent is especially attractive.

In effect, Denmark is willing to give up any decline in its interest costs il money-market rates decline for the guarantee that its cost will not top 11% percent if rates sky-

OK Tedi Mine Bid Reported

SYDNEY — Papua New Guinea's deputy prime minis-ter, Paias Wingti, has told Australian reporters in Beijing that China has offered to participate in the development of the Ok Tedi gold and copper mining

project.
But a senior member of the Port Moresby government said Monday that no official confirmation had been received.

Papua New Guinea ordered closure of the mine two weeks ago amid a dispute with the consortium of foreign compa-nies over the project's further development. Shareholders in the project are Broken Hill Proprietary Co., with 30 percent, Papua New Guinea, with 20 percent, Standard Oil Co. (Indiana), 30 percent, Degussa AG and Metaligesellschaft AG, both of West Germany, with 7.5 percent each, and West German

W. Germans Resist E-Bond Reform

FRANKFURT - Moves by the Bundesbank to allow foreign banks to lead-manage Eurobond issues denominated in Deutsche marks were rebuffed by the West German bank subcommittee last week, and the timetable for further action is unclear, bond market sources said

"The gentleman's agreement remains in force," one highly placed West German banking source said. "Nothing has changed."

The Bundesbank will now have to decide if it is to make a unilateral ruling over future market regulation. Sources said it faces a tough decision, not wishing to relinquish control over monetary policy or to irritate West German banks.

The bond-market sources said pressure for some liberalization of markets from overseas central banks, combined with political pressure on the Bonn government is likely to prove impossible to resist in the end.

But it is unlikely that any speedy changes will be made to the present rules, which have excluded foreign banks since 1981, they said. Many had expected some announcement to follow fairly soon after discus-sion of the issue last Wednesday. The six-member bank commit-

license to bring clients to the Deut-sche mark Eurobond market. But West German banks are insisting domestic investors. Many such is-sues, particularly from entities such as the World Bank or the European West German banks are insisting that this is not an offshore market in the way that the Eurodollar bond market remains exclusively outside the United States.

They maintain that banks whose home-country market does not al-low West German banks to place paper directly with investors cannot expect to be given similar rights in West Germany. U.S. banks would be most affected by such a exception.

The sources noted that apart from the stipulation that foreign borrowers cannot make domestic bond issues, the line between do-mestic and mark Eurobond markets is very hazy.

Around half of all Eurobonds denominated in marks and issued in West Germany are bought by

Investment Bank, can be used as collateral against banks' Lombard borrowing at the Bundesbank.

The lifting of the 25-percent coupon tax on interest-rate remittances to nonresident investors in domestic bonds made the difference between the two markets still more unclear.

Aside from concern over loss of monetary control, the Bundesbank would also like to make sure that it continues to have at least one West German bank involved in any fu-ture issue syndicate, the sources

They now expect further discussions to go on behind the scenes, with the Bundesbank likely to take the debate to the various bank as-

A Record Grain Crop is Changing Life in China's Countryside

(Continued from Page 7) suppliers, such as Canada. Some Washington officials place the total loss of farm exports to China as high as \$1 billion annually in 1983 and 1984, against total U.S. farm

exports last year of \$38 billion. U.S. officials believe that Beijing will still buy about four million tons of grain annually from U.S. farmers. Chinese officials have said that they will continue to export rice while importing cheaper grains, principally wheat.

Meanwhile, the grain surplus is bringing basic changes in the lives of the 2,000 people of Renhe, in Sichuan province. The agricultural policies adopted in 1978 by Deng Xiaoping were tried out first in Sichuan, Mr. Deng's native province, and they have fostered a rapid prosperity. Now, growing numbers of Renhe peasants are diversifying into other activities - raising vegetables, carpentry, pooling funds to start small shops or buy trucks.

ing wants. While sustaining the ag- controls toward market forces. ricultural boom, Mr. Deng hopes to invigorate the rest of the economy by mobilizing surplus rural labor, channeling it into small workshops, plants and service industries. Chinese economists estimate that up to 150 million of the 350 million peas-

The idea is to stimulate the kind of growth seen elsewhere in Asia, without the social costs. Instead of disruptive population shifts into the big cities, Mr. Deng envisages a rural industrialization that will begin on a small scale and become increasingly sophisticated.

To speed the process, the govern-

The pattern is exactly what Beij- cautiously away from centralized

No Communist country has attempted anything like this, and it entails major economic and political risks. Peasants who have counted on the state to buy their crops will be increasingly dependent on the marketplace. Consumers are on ants engaged in agriculture can be notice that food prices, kept artificially low by the government, will over time be allowed to float free. Laborers who have known nothing but rakes and hoes must learn new

> Prime Minister Zhao Ziyang has said of the shift to market forces, "This is what we had hoped but not dared to do for many years."

With \$17 billion in foreign-exment has begun to manipulate its change reserves, surplus grain to agricultural policies once again, sustain the country, and an already With the triple aims of diversifying impressive industrial growth rate, production away from grain, the government has judged that the matching output and consumer de- time is ripe to risk the disruptions mand, and making more effective inherent in what amounts to a sec-use of rural labor, Beijing is moving ond economic revolution.

when Mao ordained the collectiv- cord set in 1983. ization of peasant life and instituted central controls. Families were uprooted from plots and forced into production "brigades" where individualism was submerged.

In the first phase of his reforms, Mr. Deng swept much of this aside. While the principal of collective land ownership was maintained, families were assigned their own plots to farm and encouraged to "get rich." Sharp increases in the state prices for cotton and grain gave added incentives.

In Renhe township, the results were dramatic. Harvests that had been virtually static during the commune years started to boom. From an average of barely 4,000 pounds an acre (about 4,490 kilos per hectare) before the reforms, grain yields leaped to an average of 6,900 pounds in 1983. In 1984 the

licy signals an upheaval as great as harvest of 19.5 million pounds, 1.9 the one that occurred in the 1950s, million pounds higher than the re-

Across the country, average peasant incomes have nearly doubled, to the equivalent of \$110 annually per capita. In Renhe, fa-vored with the fertile paddies characteristic of Sichuan, the fig-

ures are considerably higher.
Recently, storage problems have developed along with increased grain yields. The township's granaholds nine million pounds, but its doors were almost bursting from their hinges the day it opened. But with a total income last year

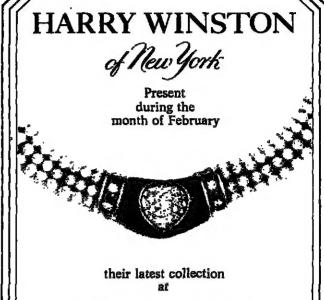

is not complaining. He has branched out into pig-raising and vegetable-growing.
"The more we work, the more we get," he said. His mother paused in her chores to add: "Old Deng gave

us back the land, and we're show-

ing him what simple people like us

Industric 752 44 25/9. AUSTRALIA Papers are invited on the following topics:

1. Computer Management and Utilization 2. Computer Graphics

3. Office Automation 4. Computers in Education

5. Data Security

6. Centralized vs. Distributed Systems

7. Computers and Simulation

8. Computers in Industrial Processes

9. Other (Specify)

The conference will include working sessions on the following key issues.

1. Computer Industry in Saudi Arabia

2. Automation of Industry

3. Computer Literacy and National Concern 4. National Computer Data Communications Requirements

The deadline for receipt of paper topic abstracts (minimum 250 words, maximum 700 words) is March 6,1985. The notification date for acceptance of abstracts is April 15,1985. The full text of papers accepted by the selection committee is to be submitted by July 17. 1985. Abstracts and papers should be mailed to the following address:

CHAIRMAN, Paper Selection Committee 8th National Computer Conference ARAMCO P.O.Box 1748 Dhahran 31311, Saudi Arabia.

THE TH NATIONAL

The Eighth National Computer Conference will be hosted by ARAMCO in Al Khobar, Saudi Arabia, on 17 Muharram 1406H, October 1, 1985. This will be a continuation of seven national computer conferences since 1394H (1974).

The National Computer Conference will be sponsored by ARAMCO as an industrial representative for the first time following successful conferences sponsered by academic representatives in the Kingdom. Never-ending development in computer technology, its effect on managing computer resources and wide-spread computer use in industry suggests the following appropriate theme:

'COMPUTERS IN MANAGEMENT AND INDUSTRY'

BOOKS

THE LIBERAL MIND IN A CONSERVATIVE AGE: American Intellectuals in the 1940s and 1950s

By Richard H. Pells. 468 pp. \$18.95. Harper & Row, 10 East 53d Street, New York, N. Y. 10022.

Reviewed by Walter Goodman

HERE they are again, those favorites of America watchers, memoir writers and connoisseurs of the higher gossip: Dwight Macdonald and Mary McCarthy; Hannah Arendt and Reinhold Niebuhr, Lionel and Diana Trilling: Sidney Hook, Irving Howe, Daniel Bell, Paul Goodman, C. Wright Mills and other present and past contributors to The Partisan Review, The New Republic, Commentary and Dissent. The New York intellectuals are fortunate this time out in being in the hands of a chronicler who grinds no axes on their reputations and does them the courtesy of close if sometimes critical readings.

In his first book, "Radical Visions and American Dreams." Professor Richard H. Pells, who teaches history at the University of Texas, looked at American intellectual life of the 1950s. Now he moves on to the next two decades, when radical visions had faded and many intellectuals were getting their highs from an America that had defeated fascism, was holding off Communism and was prospering at home.

Pells is drawn to cantankerous spirits like Dwight Macdonald, who was wary of the exer-cise of U. S. power in the 1950s. Not that Macdonald was right so much of the time —

Solution to Previous Puzzle

his withholding of support from the Allies in World War II was as wrong-headed as an egehead can get — yet by refusing to be swept along by either the Marxist train of history or the wagon train of U. S. boosters, he exercised the independence of mind that alone justifies

the intellectual's vocation. Like a scientist who has spent years studying a certain species. Pells attributes to his specimens responsibility for every ailment that has afflicted the land in the last 30 years. He blames "liberal politicians and anti-Stalinist intellectuals" for constructing the "ideology of the cold war" that was the "chief inspiration" of McCarthyism, and pins spiritual paternity on intellectuals for the Beats, the New Leftists and the counter-culturists who slouched forth in the 1950s and '60s. Surely, he is claiming too much for the influence of ideas, not giving sufficient due to the many other ingredients that, intellectuals have taught us, breed social change and political commotion.

The reader is likely to leave this book with as clear a recognition of the limitations of intellectuals as of their talents. They have, for example, not proved particularly good prophets. Generally they play catch-up with history, hastening to explicate events that they did not

hastening to explicate events that they did not foresee. They can be trenchant or merely trendy. They are at their most valuable and most entertaining when they are challenging each other's interpretations and not pretending to any priestly gift.

Pells is critical of famous observers of the 1950s like William Whyte ("The Organization Man") and David Riesman ("The Lonely Crowd") for advancing no cures for the conformity that they diagnosed. That's another thing about intellectuals — they are more comfortable at diagnosing than at prescribing.

They also tend to stand, or recline, at some

They also tend to stand, or recline, at some distance from most of the nation, a separation that sometimes misleads them but finally is their special strength, lending a kind of immu-nity against the fads and infections around them. To the degree that intellectuals succumb to popular crusades, whether for or against to popular crusades, whether for or against communism or anything else, they may win points in heaven and even do good on Earth, but at the price of compromising their own inimitable calling. As Pells reminds us, it was Dwight Macdonald's lonely and perverse dissociation from United States's war effort that permitted him to stand apart and protest against some Allied actions that cried for pro-

SPORTS

Breakthrough for 'Gentleman Tim'

DELRAY BEACH, Flordia His opponent was Scott Davis, but Tim Mayotte was remembering Björn Borg, "I remember what Borg said when he won Wimbledon," Mayotte said. "It's part preparation, part effort and part luck,"

The luck came in Sunday's third set, when umpire Charles Beck overruled a call that would have given Davis a service break and possibly a straight-sets victory. But they replayed the point, and Mayotte eventually held his service. He broke Davis in the sixth game and went on to rally for a 4-6, 4-6, 6-3, 6-2, 6-4 triumph in the inaugural Interna-tional Players Championship tournament

I was nervous in the first set and into the second," Mayotte said. "I wasn't nervous when I walked onto the court. Then it

dawned on me what I was doing

— playing in a match like this."

With the first victory of his professional career, Mayotte collected \$112,500, more than he won in all of 1984. Davis took home \$56,250, the biggest payday of his career.

Charles College

When he closed out the nearly 31/2-hour match with a smash, the man the British press calls "Gentleman Tim" because of his oncourt and off-court behavior dropped to his knees and clutched his hands to his face. Sitting on the sidelines before the awards ceremony, he cried, bury-

ing his head in his towel. There were nights during the two-week tournament when Mayotte had played virtually unnoticed in unseasonable cold. So it was understandable when he finally basked in the applause of a crowd exceeding 7,000.

"It was just one of those days, I guess, scary really, that the first win comes in such a big tournament," he said. "I'll always hold this tournament special. I'll be honored to come back here. I'll

The Davis-Mayotte final marked the first time in the open era that two unseeded players had reached the championship match in a tournament of grandslam proportions. En route to the final, Davis climinated 13thseeded Stefan Edberg and No. 11 Tomas Smid, while Mayotte eased through the 128-player draw without facing a seeded

Navratilova beating Chris Evert
Lloyd in Saturday's final), the Scrambling for every point. men's play was full of upsets. Top-rated Ivan Lendl, the French Open champion, fell, as did all of the 16 seeded players. including a strong Swedish delegation led by Australian Open winner Mats Wilander.

Ranked 45th in the world, Mayotte had reached the final with a strong service return. But that phase of his game was missing in the first two sets in the battle against his former Stanford University teammate. But then Mayotte, the 1981

National Collegiate Athletic Association singles champion with a habit of playing well in the biggest tournaments, began his

Breaking Davis in the sixth game, he took the third set and then rushed to a 5-1 lead in the fourth with third- and fifth-game breaks. Hitting now with confi-dence from the baseline and at the net. Mayotte broke Davis to player.

While the women's singles went according to form (Martina vis broke Mayotte in the sixth

Scrambling for every point. Davis reached break point three times in the eighth game; Mayotte held each time when Davis sailed service returns long. Davis, who at 22 is two years younger than Mayotte, fought off one match point and held serve in the minth game, but Mayotte would not fold.

Leading by 5-4, he tried not to think ahead during the changeover. "I was nervous," he said. "I just wanted to play a good game and not think about what it meant." Serving for the match, he fell behind, 30-40 — break point — before winning the next three points, two of them on

Voted rookie of the year in 1981 by the Association of Tennis Professionals, Mayotte reached the semifinals at Wimbledon in 1982, the quarterfinals there in 1981 and 1983, the Australian Open semifinals in 1983 and the round of 16 at both the U.S. Open and Wimbledon last (AP, NYT)

VANTAGE POINT/George Vecsey

Cynical Residue of Collegiate Double Standard

NEW YORK — Somewhere in the state of orth Carolina today, there is undoubtedly

The world could only have guessed at North Carolina today, there is undoubtedly a young college student wondering exactly be a science teacher, is working hard for grades at a junior college —and cannot dunk a basketball. Can't even dribble one.

No college officials wrote her a letter a day begging her to attend their schools, the way Jim Valvano and his literary Sancho Panza, Tom Abatemarco, did for Chris Washburn, ("Follow the Pack! We get great exposure on TV," Abatemarco scrawled.)

The future science teacher assumed she was turned down by NCS because her Scholastic Aptitude Test scores were, let's say, only 800 - and State has a healthy average of 1030 for entering freshmen. But the other day she read in the paper that State had accepted Chris Washburn, whose combined SAT scores last year were 470 - 70 points above the minimum. But Washburn, of course, can dunk a basketball.

"I don't want to mislead anybody," says Hardy D. Berry, the assistant vice chancellor at NCS. "Chris Washburn was recruited by this institution as an athlete."

Berry defends the flexible process that brought Washburn to State, saying: "I insist it's working for higher education." But he

Washburn's qualifications if he had not been what's going on at North Carolina State
University. Let's say she is 5-foot-2, wants to

The counselor indicates Washburn needs some immediate goals — he passed all four of his courses last semester — and must the state's victims' compensation fund.

• Mental-health counseling by a practitio
satisfy probation; Valvano reinstates Washburn "for the good of the kid" just before the

Atlantic Coast Conference tournament.

Asked if Chancellor Bruce Poulton and other officials are re-evaluating the role of big-time sports at State, Berry says; "I think the public expects a school to be competitive.
"The history of American sports is tied in
with education," he adds. Berry also defends
big-time sports for helping to pay for all
other sports, male and female.

Said one State teacher: "Every coach in the ACC knows they cannot win the confer-

ence championship without recruiting peoole who are incapable of graduating from a four-year college

Berry says NCS's goal for Washburn "is to get his life in perspective. Since the age of 12, 13, 14, he's been told he's the greatest."

Like so many other schools, North Carolina State has stressed the wrong values by

using professional-level athletes enrolled as students. And like many other schools, it has Washburn, who remains in school and on taught cynicism to applicants whose space

Rangers Pound Islanders, 9-3

NEW YORK - Maybe all they needed was a strong dose of hefty National Hockey League opposition. The New York Rangers got both during the weekend and the result was a sudden turnabout in their fortunes. The Rangers followed up an 8-7 victory over Edmonton on Friday with Sunday night's 9-3 rout of the New York Islanders in a brawl-marred game.

After managing only 18 goals during an 0-6-1 road swing, the Rangers erupted for 17 goals in two nights at home against last year's Stanley Cup finalists. The Rangers moved three points

ahead of New Jersey in the race for the final playoff spot in the Patrick Division as rookies Tomas Sandstrom, George McPhee and Grant Ledyard had big nights — Sandstrom getting a goal and two assists and McPhee and Ledyard scoring 39 seconds apart in a five-goal blitz during a 61/2-minute span of the second period.

These games give us more excitement and more drive," said de-

Los Angeles, which has won 12 of 14 games since a two-point loss Jan. 16 at Boston, used an 8-2 spurt to take a 26-21 advantage with three minutes left in the first period Larry Bird brought Boston

The score was tied 103-103 with 2:34 left to play before Michael Cooper's lay-up put the Lakers ahead for good. After Bird missed a 3-point try with the shot clock running down, James Worthy made a short jumper and was fouled by Scott Wedman. The free throw gave Los Angeles a 108-103 edge. Worthy added 24 for the Lakers.

for the Celtics. "I felt we had a great opportuni-ty to win," Bird said. "It's a tough loss but you can't be down too long

Translating: Language Is Not Enough

By Shawn G. Kennedy New York Times Service

N EW YORK — The popular notion of the translator is of a spectacled soul hunched over dictionaries and phrase books. while his counterpart, the interpreter, is seen at the elbow of diplomats or in the glass-enclosed language booths of the United Nations. But language experts say these visions of their work are outmoded.

The skills of the translator, who takes the printed word from one language to another, and the interpreter, who translates speech, are today as likely to be sought by high-tech manufacturing companies, advertising agencies and film companies as by publishing houses, governments or global organizations.

Technological advancements, such as the development of computers that translate, have altered the way language experts do their jobs. But most professionals view electronic translators and computerized dictionaries as timesaving aids rather than as rivals.

"The profession has blossomed and technology has made our work faster, more exact and more complete," said Irene Agnew. The Los Angeles-based translator and interpreter founded a computerized translation service, Agnew Tech-Tran, which she sold to Berlitz Translation Services.

The expanding global marketplace, competition from industrialized nations such as Japan and West Germany and the emer-gence of the Middle East in international affairs have all had an impact on the profession. Demand is particularly great for those fluent in Japanese, Chinese and Arabic and for professionals with technical or scientific backerounds.

David Lanbe, director of marketing for Berlitz Translation Services, a subsidiary of the worldwide language school, said that for U.S. companies the ability to communicate with potential clients and consumers overseas is a tool of competition.

"At one time, for example, many American manufacturing companies felt comfortable ex-porting printed materials like product instruction booklets or repair manuals in English, assum-

Bruce Boeglin sees more teleconference interpreting.

ing they would be translated overseas," he said.

No statistics exist on numbers in the translation profession, in part because there is no state or federal certification. But Eva Berry, outgoing president of the American Translators Association, said more Americans were joining the profession. Since its founding in 1960 the association has grown from a few hundred to nearly 1,000 members.

John C. Miller, director of the foreign-language program at the School of Continuing Education at New York University, agrees,

"At one time a great many of the translators and interpreters working in the United States were foreign born, people who came here after the war," he said. "But that generation of language professionals is reaching retirement age and they are being replaced by young, well-educated Ameri-cans who have studied foreign languages and lived abroad."

Berlitz saw a demand for specialized translation as more of its language instructors were asked by companies to be translators. Two years ago Berlitz established its translation division and it now has a full-time staff of 60 transla-

tors in seven branches. Among the companies that have stepped up their use of translators is Hughes Ground Systems, a California-based mili-

tary supplier. "In recent years our

business has expanded beyond the NATO European countries to areas of the world like Asia and the Middle East where a knowledge of English is less prevalent, said George Flores, who acts as a liaison between the company's technical divisions and the translation services and consultants it

uses. "Our requirement for for-

few years and will probably continue to grow." Peggy Gowen, a free-lance translator and interpreter who runs a service from her home in Manhattan, has seen several changes since she entered the field more than 20 years ago, including a demand for languages spoken in the Far East and Middle East as well as an increase in the amount of technical material

A typical assignment when she began her company in the 1970s, she said, was acting as an es-cort/interpreter for a European fabric company or fashion house.

she is asked to translate.

"Now my work frequently involves the translation of a legal document or material for an industrial manufacturing compaworked for the United Nations fluent in French, Italian, Gerguages in school and learned others while working abroad

While the zeed of the business community for foreign-language experts is clear, the State Department remains probably the largest U.S. employer of translators and interpreters. Donald Barnes. chief of interpreters, maintains a roster of 1,000 full-time and parttime workers who interpret for Foreign Service personnel and serve as escorts for visiting dignitaries. The agency tests applicants and requires no previous professional experience.

Bruce Boeglin, who has worked as a UN conference interpreter, foresees growing work opportunities for interpreters.

"As teleconferencing, via satellite, becomes a standard way of communicating in the business world, the use of conference interpreters by the private sector will increase," said Boeglin, who just retired as training officer in the UN interpreters section.

An academic knowledge of a language or the ability to do word-for-word translation of the spoken or written word is not enough. Those with an area of expertise have a definite edge. A director of Ad-Ex, a transla-

eign-language experts is ongoing and has grown twofold in the past tion service in Palo Alto, California, serving companies in Silicon Valley, went so far as to say that his company hired few translators without backgrounds in engineering, chemistry or mathemat-

> Jerry Mryglot, a staff translator for Berlitz who holds a bachelor's degree in Russian from Columbia University and a master's degree in the language from Stan-ford University, took a course in securities to assist him with the large amount of financial material he was asked to translate.

Despite the evidence of broadened opportunities for translators and interpreters with certain language and technical specialties, some in the profession say the current economic climate has suffered the competition among the translation services and those who free-lance. "The strong U.S. ny," said Gowen, who has dollar is hurting as now," said Berry of the American Translaand the State Department and is tors Association, who runs her own translation service. "Compaman, Spanish, Portuguese and nies are cutting costs by having Arabic. She studied several lan-their work done overseas."
